BHAMCHIK GROUP
AI SYSTEMS BLUEPRINT

Bhamchik Group sells second homes to 2nd home buyers, with handcraft and construction lines set aside for this document on the owner's own instruction. By the owner's figures, 800 to 1000 leads a month arrive in the CRM and 6 orders a month close at an average of 3000000, over a 2 to 3 month cycle, with 15 people and a turnover band of ₹10 to 50 lakh a month. Every one of the seven stations on the money path is still done by hand, and the owner personally handles every deal, operation and audit. This blueprint proposes three builds, a finance system, one lead-to-handover funnel and one central desk, placed across twelve weeks before DEC, starting with the Lead-to-Visit Flow on the CRM and WhatsApp API already paid for, with the pages counting about ₹76,000 a month in conservative rupee savings before hours.

PREPARED FOR
SHUBHAM MANJUNATH ANVEKAR
BLUEPRINT AUDIT 07.11.2026
BHAMCHIK GROUP

01 THE NUMBERS — DASHBOARD TILES · AS PROVIDED BY CLIENT

800 to 1000	10 to 15	20 to 30	6	3000000	2 to 3 month	10%	15
LEADS A MONTH	QUOTES A MONTH	OUT OF 100 QUOTES, ORDERS	ORDERS A MONTH	AVERAGE ORDER VALUE	SALES CYCLE	REPEAT CUSTOMERS	TOTAL HEADCOUNT
AS WRITTEN	AS WRITTEN	AS WRITTEN; SITS UNEASILY WITH 6 ORDERS FROM 10 TO 15 QUOTES, SEE BELOW	AS WRITTEN	AS WRITTEN; 6 ORDERS AT THIS VALUE EXCEEDS THE STATED TURNOVER BAND, SEE BELOW	AS WRITTEN	AS WRITTEN	AS WRITTEN

Every figure on these tiles is the owner's own, printed unchanged. Three of them cannot stand together and it is for the owner to settle which is right. First, 10 to 15 quotes a month with 20 to 30 orders out of every 100 quotes gives roughly 2 to 4 orders a month, not the 6 stated; 6 orders from 10 to 15 quotes would mean 40 to 60 out of 100 close, double the stated rate. The 2 to 3 month cycle may explain some of the gap if this month's 6 orders came from earlier months' quotes, but the owner should confirm. Second, 6 orders at 3000000 each is ₹1.8 crore a month, which lies outside the ₹10 to 50 lakh monthly turnover band ticked on the form; either the order value, the order count or the band is off, or the figure counts booking value rather than money received. Third, 800 to 1000 leads producing 10 to 15 quotes means roughly one or two leads in a hundred reach a quotation; that is not a contradiction but it is the number that decides where the first build goes. The headcount of 15 is consistent with the people map of one owner, one sales manager and staff. Repeat customers at 10% and sales cycle at 2 to 3 months are taken as written and support the retention calendar and follow-up spacing proposed in the pages.

02 THE MONEY PATH TODAY — FLOWCHART · ENQUIRY TO FINAL PAYMENT

01
come in crm
Lead lands in CRM, then the team manually calls them. Meta ads and the portal are the sources.

02
send details by watspp
Team sends project details by WhatsApp by hand, despite a paid WhatsApp API.

03
5 to 6 follow up by call n watspp API
Five to six touches across the 2 to 3 month cycle, done by the team from memory.

04
shedual to visit
Site visit booked by hand, no calendar or confirmation.

05
closing process from sending to quotation
Quotation prepared and sent by hand; price stays human by the owner's own rule.

06
gennrate token sendinag recipt
Token taken and receipt typed by hand; no ledger behind it.

07
all follow up
Instalment and payment chasing by whoever remembers.

☐ STILL DONE BY HAND 7 OF 7 STATIONS

Seven stations, seven marked by hand. Every one is an automation candidate. The first four sit on the CRM and WhatsApp API already paid for and used, which is why the pages put the Lead-to-Visit Flow first. Stations five and six carry price and money and keep a human gate: the owner fills the price on every quotation, and a receipt is generated only after someone ticks that the money has landed in the bank. Station seven, all follow up, becomes the Payment Reminder Flow off an instalment schedule that does not exist yet because there is no accounting system.

03 WHERE THE VOLUME GOES FUNNEL

FROM THE OWNER'S OWN THREE FIGURES. THE STEEP DROP FROM LEADS TO QUOTES IS THE SHAPE; THE QUOTE-TO-ORDER STEP IS THE QUESTION.

The funnel narrows hard at the first step: of 800 to 1000 leads, 10 to 15 reach a quotation, roughly one or two in a hundred. It then barely narrows at all: 6 orders from 10 to 15 quotes is 40 to 60 out of 100, while the owner separately stated 20 to 30 out of 100 quotes become orders. Both cannot be true in the same month. Either quotes are undercounted, orders are counted on a different basis, or the 2 to 3 month cycle is carrying orders across months. The owner settles this; the Funnel Board will then show the real shape every month.

04 WHO HOLDS THE WORK PYRAMID · ORG LAYERS

"every deal/operation/audit"

The middle is not empty but it is one person wide, and the owner has written himself into it. Everything that is not sales, meaning finance, HR, site operations and audit, has no manager and so lands on the owner. The three builds are each a way of putting a named system where a manager would otherwise sit: the Munshi for accounts, the Funnel Keeper under the sales manager, the Desk Keeper for the day's open and close.

05 WHAT THE OWNER HAS ALREADY TRIED, AND WHAT IS IN SCOPE BEFORE / AFTER

ALREADY TRIED

ChatGPT, Base44, Cloud, Gemini, and all trending AI tools

Was: Many tools opened, none of them wired to the CRM, WhatsApp API, Meta ads or portal that are paid for and used. Nothing on the money path changed.

Now: Nothing new to learn first. The first build runs on the CRM and WhatsApp API already in daily use, and stops at the quotation for the owner to fill the price.

THREE LINES, ONE IN SCOPE

Real Estate, HandCraft, Construction

Was: Three businesses under one group, with the owner stating plainly, BUT I M DOING FOR REAL ESTATE.

Now: Every system on these sheets is for real estate only. Handcraft and construction are not touched until months 9 to 12, and only after the funnel has been reviewed against the owner's own 10 to 15 quotes and 6 orders.

OWNER'S HOURS

7 to 10 hours a week, deadline before DEC

Was: The owner is the help desk, the reminder and the auditor for 15 people, and still handles every deal and every audit personally.

Now: The owner's hours go to three things only: price and financial decisions, approving quotations and payments, and reading three evening notes. Everything else is drafted by a system and waits for a tap.

These are the two findings most likely to decide whether the build survives the first month: the owner has tried tools before without a wired-in flow, and the group has three lines but only one is being built for. Both are stated in the owner's own words and both are honoured on every page.

06 **RECOMMENDED AI SYSTEMS** SYSTEMS · FOUNDATION FIRST

F-00 · P1 — Bhamchik Single Record

LEAD LANDS IN THE CRM ALREADY PAID FOR
↓
UNIT, TOKEN AND INSTALMENT ATTACHED TO THE SAME RECORD
↓
STAFF MEMBER WHO OWNS IT NAMED ON THE ROW
↓
EVERY LATER SYSTEM READS THIS ROW, NONE KEEPS ITS OWN COPY

WHY FIRST
the brief has a CRM, a WhatsApp API, Meta ads and a portal paid for and used, but every step from come in crm to all follow up is still done by hand because nothing links them.

OPEN INPUT
the CRM name and whether the portal pushes leads into it were not stated.

SOLVES THERE IS NO SINGLE PLACE WHERE A LEAD, A RUPEE AND AN EMPLOYEE CAN BE SEEN WITHOUT A PHONE CALL.

SYS-01 · P1 — Bhamchik Lead-to-Visit Flow

NEW LEAD IN CRM FROM META, PORTAL OR WALK-IN
↓
PROJECT DETAILS SENT ON WHATSAPP API WITHIN MINUTES
↓
CALL TASK CREATED FOR THE ASSIGNED STAFF MEMBER
↓
5 TO 6 FOLLOW-UPS ON SET DAYS, PAUSED WHEN THE LEAD REPLIES
↓
VISIT SLOT OFFERED, BOOKED, REMINDED THE DAY BEFORE
↓
QUOTATION DRAFTED WITH PRICE LINE BLANK, PARKED FOR THE OWNER

WHY FIRST
sits on the CRM and WhatsApp API already paid for; takes manual calling, send details by watspp, 5 to 6 follow up and shedual to visit off staff for every one of the 800 to 1000 leads a month.

GUARDRAIL
no price, discount or payment plan is ever set by the flow; the owner fills the price and taps approve before any quotation leaves.

SOLVES TEAM MANUALY CALL TO THEM, SEND DETAILS BY HAND, 5 TO 6 FOLLOW UP BY HAND, SHEDUAL TO VISIT BY HAND.

SYS-02 · P1 — Bhamchik Second Home Sales Skill

SALES MANAGER DICTATES HOW A SECOND HOME IS SOLD TODAY
↓
FIRST REPLY, 5 TO 6 FOLLOW-UPS AND VISIT PITCH WRITTEN DOWN
↓
OBJECTIONS ON MAINTENANCE, YIELD AND DISTANCE ANSWERED ONCE
↓
RETENTION TOUCHES FOR THE 10% REPEAT DRAFTED
↓
OWNER SIGNS THE SCRIPT; THE FLOW READS IT

ADOPTION
the sales manager must give two or three hours in weeks 1 to 2; the script is in the words used on the phone today, not new ones.

GUARDRAIL
any price, offer or payment plan in a drafted message is typed by the owner or sales manager before it goes out.

SOLVES EACH STAFF MEMBER WRITING THEIR OWN WHATSAPP MESSAGES FROM MEMORY, WITH NO FIXED SCRIPT FROM LEAD TO HANDOVER.

SYS-03 · P2 — Bhamchik Receipt and Ledger App

MONEY LANDS IN THE BHAMCHIK BANK ACCOUNT
↓
OWNER OR SALES MANAGER TICKS THAT IT LANDED
↓
CUSTOMER, UNIT, AMOUNT, MODE, DATE ENTERED ONCE
↓
NUMBERED RECEIPT PDF SENT ON WHATSAPP
↓
CREDIT ENTRY POSTED, UNIT OUTSTANDING UPDATED
↓
EXPENSES ENTERED WITH A PHOTO OF THE BILL

GUARDRAIL
a receipt is generated only after the owner or sales manager ticks that the money has actually landed in the bank.

ADOPTION
staff must enter every token and expense on the phone instead of noting it in chats; nothing is receipted that is not entered.

SOLVES NO ACCOUNTING SYSTEM IN OUR COMPANY; GENNRATE TOKEN SENDINAG RECIPT DONE BY HAND AND EXPENSES REMEMBERED LATER.

SYS-04 · P2 — Bhamchik Payment Reminder Flow

INSTALMENT DATE APPROACHING OR PASSED ON A UNIT'S SCHEDULE
↓
LEDGER CHECKED: NOTHING RECEIVED AGAINST IT
↓
REMINDER DRAFTED WITH NAME, UNIT, AMOUNT, DATE AND SENT ON WHATSAPP
↓
SECOND REMINDER IF UNPAID, UNIT FLAGGED TO SALES MANAGER AND OWNER
↓
RECEIPT GENERATED: FLOW STOPS AND SENDS THANK YOU

GUARDRAIL
any extension, waiver, late charge or change to an amount is never sent by the flow; the owner writes it and only then it goes out.

OPEN INPUT
the standard instalment schedule for a 3000000 sale was not stated; the flow cannot start without it.

SOLVES ALL FOLLOW UP FOR INSTALMENTS DONE BY WHOEVER REMEMBERS, AND SOME FORGOTTEN.

SYS-05 · P3 — Bhamchik Funnel Board

LEADS FROM META AND PORTAL COUNTED IN
↓
CALLS MADE, DETAILS SENT, VISITS BOOKED SHOWN BY STAGE
↓
OVERDUE FOLLOW-UPS LISTED BY STAFF NAME
↓
QUOTATION AGE TRACKED ACROSS THE 2 TO 3 MONTH CYCLE
↓
COST PER LEAD AND PER VISIT BY CAMPAIGN READ FROM THE AD ACCOUNT

WHY FIRST
it reads the CRM rows S-01 has been filling for six weeks, so it shows real figures the day it goes live.

GUARDRAIL
any change to Meta ad spend suggested by the board is made by the owner, never by the board.

SOLVES OWNER PERSONALLY CHECKING EVERY DEAL BY PHONE, AND NO VIEW OF WHICH CAMPAIGN BRINGS BUYERS WHO VISIT.

SYS-06 P3

Bhamchik Finance Board

LEDGER ENTRIES FROM S-03 READ IN
↓
PAID, DUE AND OVERDUE SHOWN UNIT BY UNIT
↓
SALARY, INCENTIVE, BROKERAGE AND SITE BILLS OWED WITH DATES
↓
RUNNING PROFIT AND LOSS FOR THE MONTH
↓
RED MARK WHERE LEDGER AND BANK DO NOT MATCH

GUARDRAIL
nothing moves from the board; any payment, release of incentive or change to a customer's schedule happens only when the owner marks it approved.

OPEN INPUT
the incentive rules are not written anywhere today; the owner signs them once before any incentive figure is drafted.

SOLVES PROFIT AND LOSS KNOWN ONLY AT YEAR END; THE OWNER AUDITS EVERY DEAL PERSONALLY TO KNOW WHERE THE MONEY STANDS.

SYS-07 P4

Bhamchik Login Desk

ROLES AND ACCESS SOP SIGNED: OWNER, SALES MANAGER, STAFF
↓
NAME, ROLE, OFFICE OR SITE, MOBILE ENTERED
↓
USER ID AND FIRST PASSWORD ISSUED WITH OWNER APPROVAL
↓
EACH PERSON SEES ONLY THEIR OWN TASK PAGE
↓
LEAVING STAFF SWITCHED OFF IN ONE CLICK

GUARDRAIL
every new login and every change of role is approved by the owner before it is created; no money figure appears on any staff view.

ADOPTION
all 15 people must log in from a phone; on-site staff stop reporting by call.

SOLVES NO LOGIN TODAY; WORK IS TRACKED BY CALLING PEOPLE AND ASKING, AND HR MANAGMENT IS MANUAL.

SYS-08 P4

Bhamchik Day Open and Close Routine

FIXED MORNING TIME: EACH TASK PAGE REFRESHED
↓
NOT LOGGED IN BY SET TIME: ONE WHATSAPP REMINDER
↓
EVENING: UNDONE ITEMS ROLLED FORWARD AND FLAGGED
↓
DAY-CLOSE SUMMARY SENT TO OWNER AND SALES MANAGER
↓
LOGIN OR ACCESS REQUESTS QUEUED FOR OWNER APPROVAL

GUARDRAIL
creation of any user, change of any role and any access to finance pages waits for the owner in the queue.

ADOPTION
this only works if S-07 logins are in daily use; it runs on the same desk, not a new one.

SOLVES MORNING CALLS TO FIND OUT WHO IS WHERE AND EVENING CALLS TO FIND OUT WHAT GOT DONE.

Everything stands on the CRM, WhatsApp API, Meta ads and portal that are paid for and used; nothing new is bought in twelve weeks. Handcraft and construction are left out, BUT I M DOING FOR REAL ESTATE. The named AI employees (Munshi, Funnel Keeper, Desk Keeper) and the Lead Qualifier are in the in-depth pages for months 4 to 9, after the record under them is clean. Nothing marked wants to stop paying for or paid for and never opened was answered, so no tool is retired on this sheet.

SYS-04 Bhamchik Payment Reminder Flow		Instalments chased on schedule				
SYS-05 Bhamchik Funnel Board			Leads to orders on one screen			
SYS-06 Bhamchik Finance Board			Cash, dues and P&L daily			
SYS-07 Bhamchik Login Desk				15 IDs, 3 views		
SYS-08 Bhamchik Day Open and Close Routine					Day opens and closes itself	

P1 DONE WHEN

Every new lead from Meta and the portal exists as a CRM row with a named staff owner, has received project details on WhatsApp within minutes, and its follow-ups and visit date are visible on that row; every quotation is parked waiting for the owner's price.

P2 DONE WHEN

Every token and instalment received from week 3 onward has a numbered receipt, a ledger entry and an updated unit outstanding, and every instalment due has been reminded on WhatsApp without a staff member sending it.

P3 DONE WHEN

The owner and the sales manager can open the Funnel Board and the Finance Board at 9 AM and see leads, overdue follow-ups, quotation age, cash in bank, dues and the month's profit and loss without making a single phone call; the Roles and Access SOP is signed.

P4 DONE WHEN

All 15 people have their own login and see only their role's pages, the day opens and closes with one summary to the owner, and the owner can point at the desk and say this is the big thing we started: manual chq report, quotation, follow up and deal tracking no longer sit with a person.

08 WHY THIS BUILD ORDER 2 × 2 MATRIX

HIGH IMPACT · RUNS WITHOUT ANYONE CHANGING	HIGH IMPACT · NEEDS PEOPLE TO CHANGE
F-00 Bhamchik Single Record	SYS-02 Bhamchik Second Home Sales Skill
SYS-01 Bhamchik Lead-to-Visit Flow	SYS-03 Bhamchik Receipt and Ledger App
COMPOUNDING · NEEDS CLEAN DATA	**GROWTH · UNBLOCKS SCALING**
SYS-04 Bhamchik Payment Reminder Flow	SYS-07 Bhamchik Login Desk
SYS-05 Bhamchik Funnel Board	SYS-08 Bhamchik Day Open and Close Routine
SYS-06 Bhamchik Finance Board	

LOW DEPENDENCE ON HUMAN CHANGE → HIGH

Runs-alone goes first: S-01 and F-00 need nobody in the business to change what they do and run on data already in the CRM. Needs-people (S-02, S-03) is placed in the same weeks because the sales manager's script and staff entering receipts are the two behaviour changes the rest depend on. Compounding (S-04, S-05, S-06) waits for clean rows and a ledger. Growth (S-07, S-08) comes last so that the desk opens onto boards that already have figures. With 7 to 10 hours a week from the owner, no phase asks for more than one owner decision a week.

09 GUARDRAILS SWIMLANE · SET BY THE CLIENT

AI ACTS ALONE	MANAGE SALE FUNNEL · GENERATE AI AGENT FOR MANAGE ALL THIS WITH POSSIBLE
HUMAN SIGNS OFF	PRICE OR ANY FINANCIAL DECISION
NEVER AUTOMATED	NOT SET: THIS ANSWER WAS LEFT BLANK. THE CAREFUL DEFAULT APPLIES: HIRING, LETTING GO, CHANGING A PERSON'S ROLE OR ACCESS, AND WRITING THE INCENTIVE RULES STAY WITH THE OWNER AND SALES MANAGER UNTIL THE OWNER STATES OTHERWISE.

The owner's own two rules are printed as written. Every flow on this sheet stops at price, discount, payment plan, token amount, salary, incentive and any payment; it drafts, parks and waits. The third rule is unset and should be written in the owner's words at the first review.

10 NEXT STEPS IMMEDIATE ACTIONS

01 Confirm or correct everything on these sheets, in particular: 10 to 15 quotes a month at 20 to 30 of 100 closing does not produce 6 orders a month, and headcount 15 against the sales manager and me plus staf; these are yours to settle. OWNER	02 Give build access to the CRM and WhatsApp API, and confirm whether the portal pushes leads into the CRM or someone types them. OWNER	03 Sit for two or three hours in weeks 1 to 2 and dictate the sales script: first reply, 5 to 6 follow-ups, visit pitch, objections. SALES MANAGER	04 Write and sign the instalment schedule for a standard sale, the receipt format and the incentive rules before week 3; none of P2 can start without them. OWNER	05 Decide the third guardrail, never automated, in your own words. OWNER	06 Name the one person on staff who will enter every receipt and expense from week 3. OWNER WITH SALES MANAGER

START HERE

Bhamchik Lead-to-Visit Flow

For problem 2: Problem 2: Lead to handover to retention, one Bhamchik funnel

It sits on the CRM and the WhatsApp API you already pay for, so it is the fastest build with the biggest return on this sheet: it takes the manual calling, the send details by watspp, the 5 to 6 follow up and the shedual to visit off your staff for every one of the 800 to 1000 leads a month. It stops at the quotation and waits for you to fill the price, so it respects your rule that price or any financial decision stays with a person, while freeing the hours that the finance system and the central desk will need from you and the sales manager.

PROBLEM 1 OF 3

Problem 1: Bhamchik Finance System, from token receipt to profit and loss

> *"No accounting system in our company, so we need to organize a finance system... all payments need to be followed up, salary, incentive, receipt, everything related to finance / all credit debit entry / profit & loss / automatic payment reminder to customer"*

9 AM TOMORROW At 9 AM the Bhamchik Finance Board already shows money in bank, instalments due this week, salary and incentive owed, and the customer reminders for the week have gone out without anyone opening WhatsApp.

FIVE WAYS TO ATTACK IT

1. CLAUDE SKILL

Bhamchik Finance SOP Skill

One written finance rulebook for Bhamchik Group that the AI reads before it drafts anything: how a 2nd home sale moves from token to booking amount to instalments to registration, what a receipt must carry, how salary and incentive are worked out, and what a month's credit, debit and profit and loss look like.

- Encodes the Bhamchik chart of accounts: token, booking, instalment, registration charges, brokerage payable, site expenses, salary, incentive, office cost.
- Drafts the numbered receipt format, the instalment reminder messages in polite Hindi and English, and the monthly profit and loss layout.
- Holds the incentive rules exactly as the owner writes them, so every incentive figure is drafted the same way every month.
- Lives as a document the owner can edit in ten minutes when a rule changes.

REPLACES

Finance rules that today sit in the owner's head and in old WhatsApp chats with the sales manager.

DIFFICULTY

Easy

CONFIDENCE

High

CONSERVATIVE SAVING

6 hours a month

> OWNER APPROVES The owner signs the incentive rules and the reminder wording once before the skill is used, and again whenever a rule changes.

2. MICRO-APP

Bhamchik Receipt and Ledger App

A small phone-friendly tool for the step the brief calls gennrate token sendinag recipt. Inputs: customer name, unit or plot, amount, payment mode, date. Outputs: a numbered receipt PDF sent on WhatsApp, a credit entry in the Bhamchik ledger, and the updated outstanding for that unit.

- Every rupee received against a unit is entered once and appears in three places at the same time: receipt, ledger, and unit outstanding.
- Debit side too: salary, incentive, brokerage, site and office expenses are entered with a photo of the bill.
- Shows paid versus due for each unit against its instalment schedule, so no one has to search old chats to answer a customer.
- Exports a clean credit debit sheet the CA can use at year end.

REPLACES

Receipts typed by hand, token amounts noted in chats, and expenses remembered later.

DIFFICULTY

Medium

CONFIDENCE

High

CONSERVATIVE SAVING

₹3,000 a month · 10 hours a month

> OWNER APPROVES A receipt is generated only after the owner or sales manager ticks that the money has actually landed in the Bhamchik bank account.

3. DASHBOARD

AS YOU IMAGINED

Bhamchik Finance Board

The dashboard the owner asked for, built on top of the ledger app. One screen that makes visible what is invisible today: cash in bank, money due from customers this week and this month, salary and incentive owed, brokerage and vendor payable, and a running profit and loss for the month.

- Unit by unit view: paid, due, overdue, with the next instalment date for each 2nd home buyer.
- Money owed by Bhamchik: salary, incentive drafted from closed deals, brokerage, site bills, with due dates.
- Rough profit and loss for the month that firms up as entries come in, so the owner stops waiting for year end to know the position.
- Red marks where the ledger and the bank do not match, which is the audit the owner currently does personally on every deal.

REPLACES

The owner personally auditing every deal and every operation to know where the money stands.

DIFFICULTY

Medium

CONFIDENCE

Medium

CONSERVATIVE SAVING

12 hours a month

> OWNER APPROVES Nothing moves from the board. Any payment, release of incentive, or change to a customer's schedule shown here happens only when the owner marks it approved.

4. AUTOMATION

Bhamchik Payment Reminder Flow

The automatic payment reminder to customer, run off the instalment schedule in the ledger. It does the chasing the brief calls all follow up, without touching the amount or the terms.

- Trigger: an instalment date on any unit's schedule is coming up, or a due date has passed with no receipt in the ledger.
- Step 1: check the Bhamchik ledger to confirm nothing has been received against that instalment.
- Step 2: draft the reminder from the Finance SOP Skill with the customer's name, unit, amount and date, and send it on the existing WhatsApp API.
- Step 3: if the due date passes unpaid, send a second reminder and flag the unit to the sales manager and the owner on the Finance Board.
- Step 4: the moment a receipt is generated, the flow stops for that instalment and sends a thank you with the receipt attached.

REPLACES

Staff calling and messaging customers for instalments by hand and forgetting some of them.

DIFFICULTY

Easy

CONFIDENCE

High

CONSERVATIVE SAVING

8 hours a month

> OWNER APPROVES The owner approves the reminder wording and the schedule at setup. Any extension, waiver, late charge, or change to an amount is never sent by the flow; it is written by the owner and only then goes out.

5. AI AGENT SCOPING CALL

Bhamchik Munshi

A named AI accounts clerk for Bhamchik Group. It keeps the books every day, drafts salary and incentive sheets from the SOP, prepares the monthly profit and loss, and tells the owner where the ledger and the bank disagree. It never pays anyone and never changes a figure on its own.

- Trigger: every evening after office hours, and on the first working day of each month.
- Every evening: reads the day's receipts and expense entries, matches them against the bank, posts the credit and debit entries, and lists any gap, such as money in bank with no receipt or a receipt with no bank entry.
- Every month: drafts the salary sheet for the fifteen people on the Bhamchik team and the incentive sheet for the sales manager and staff from the deals closed, using the rules in the Finance SOP Skill.
- Reports: a short WhatsApp note to the owner each evening with cash position and gaps; a monthly profit and loss draft to the owner; the incentive draft to the sales manager for checking before it reaches the owner.

REPLACES

The accounting system Bhamchik does not have today, and the owner's evening hours spent checking every deal.

DIFFICULTY

Hard

CONFIDENCE

Medium

CONSERVATIVE SAVING

₹8,000 a month · 15 hours a month

> OWNER APPROVES Salary and incentive are paid only after the owner signs the sheet Bhamchik Munshi drafts. Every financial decision, as the owner set in the guardrails, stays with the owner; the Munshi prepares, it never pays.

PROBLEM 2 OF 3

Problem 2: Lead to handover to retention, one Bhamchik funnel

> *"Need to do sales and marketing setup for our company. CRM setup needs to do crm of my own and a follow-up system for customers, from generating leads to handing over the product to the customer retention process"*

9 AM TOMORROW At 9 AM tomorrow the Bhamchik Funnel Board shows every lead from Meta and the portal that came in overnight, who on staff owns it, which of the 5 to 6 follow-ups is due today and which site visits are booked, and nobody has opened the CRM by hand to find that out.

FIVE WAYS TO ATTACK IT

1. CLAUDE SKILL

Bhamchik Second Home Sales Skill

Encodes how Bhamchik sells a second home: the questions to ask a new lead, the project details sent on WhatsApp, the 5 to 6 follow-up touches, the visit pitch, and the after-handover retention call. It drafts the messages your team sends today by hand.

- Captures your SOP from lead in CRM to key handover, step by step, in the words your sales manager uses on the phone.
- Drafts the first WhatsApp reply with project details, the 5 to 6 follow-up messages spaced across the 2 to 3 month cycle, the visit confirmation and the post-visit note.
- Drafts the quotation cover note and the handover checklist, but leaves the price line blank for a human to fill.
- Drafts the retention sequence for the 10 percent who come back: anniversary of possession, new launch note, referral request for a friend wanting a second home.
- Holds the objections a second home buyer raises, such as maintenance, rental yield and distance from city, and the answer Bhamchik gives to each.

REPLACES

Each staff member writing their own WhatsApp messages and follow-ups from memory, with no fixed script from lead to handover.

DIFFICULTY

Easy

CONFIDENCE

High

CONSERVATIVE SAVING

15 hours a month

> **OWNER APPROVES** Any price, offer or payment plan mentioned in a drafted message is typed in by the owner or sales manager before it goes out.

2. MICRO-APP

Bhamchik Lead Qualifier

A small tool the team opens for each new lead. Inputs: the lead details from CRM, budget range the buyer states, preferred location and timeline. Outputs: a hot, warm or cold tag, the matching project, the next action and the follow-up date.

- Inputs come straight from the CRM record, the Meta form and the portal enquiry, so staff do not retype.
- Scores the lead on budget fit, timeline and intent, using rules the sales manager sets, not a price.
- Outputs the first WhatsApp message to send, the staff member to call, and the date of the next follow-up.
- Flags a lead that needs a site visit and offers three visit slots from the office calendar.
- Flags any lead that asks for a discount or a payment plan and sends it to the owner, since that stays human.

REPLACES

Manual calling of 800 to 1000 leads a month in no fixed order, with no tag for who is worth a visit.

DIFFICULTY

Medium

CONFIDENCE

High

CONSERVATIVE SAVING

25 hours a month

> OWNER APPROVES Scoring rules are set by the owner, and any lead flagged for discount or payment plan waits for the owner before a reply.

3. DASHBOARD

AS YOU IMAGINED

Bhamchik Funnel Board

The dashboard you asked for, extended to the full path: leads in, calls made, details sent, follow-ups done, visits booked, quotations out, tokens taken, handovers done and retention calls due. One screen for you and the sales manager.

- Shows the funnel for the month: leads from Meta and the portal, how many reached a call, how many reached a site visit, how many reached quotation, against your own figures of 10 to 15 quotes and 6 orders.
- Shows every lead whose follow-up is overdue, by staff name, so the follow-ups that were missed are visible the same day.
- Shows the age of each quotation and where it sits in the 2 to 3 month cycle, so a deal going quiet is seen before it is lost.
- Shows handovers due and retention touches due for past buyers, so the 10 percent repeat does not depend on memory.
- Marketing side: cost per lead and cost per visit by Meta campaign and portal, read from the ad account, so the owner sees which spend brings visits and not just enquiries.

REPLACES

Owner personally checking every deal by phone and by opening the CRM, and no view at all of which campaign brings buyers who visit.

DIFFICULTY

₹15,000 a month · 20 hours a month

> OWNER APPROVES Any change to Meta ad spend suggested by the board is made by the owner, never by the board.

4. AUTOMATION

Bhamchik Lead-to-Visit Flow

Trigger: a new lead lands in the CRM from Meta, the portal or a walk-in. The flow sends details, assigns the call, runs the follow-ups and books the visit, and stops at the quotation for the owner.

- Trigger: new lead created in CRM from Meta ads, the portal or manual entry.
- Step 1: WhatsApp API sends the project details within minutes, in the Bhamchik script, and creates a call task for the assigned staff member.
- Step 2: the 5 to 6 follow-ups go out on the set days by WhatsApp, each one paused if the lead replies, and the call task repeats if no reply.
- Step 3: when the lead says yes to a visit, the flow offers slots, books it in the calendar, sends a confirmation and reminds the lead and the staff member the day before.
- Step 4: after the visit, the flow drafts the quotation with the price line blank and sends it to the owner for approval. Nothing leaves until the owner fills the price and taps approve.

REPLACES

The team manually calling, manually sending details on WhatsApp, manually doing 5 to 6 follow-ups and manually scheduling visits.

CONSERVATIVE SAVING

₹20,000 a month · 50 hours a month

> OWNER APPROVES The owner fills the price and approves every quotation before it is sent. No discount, payment plan or price is ever set by the flow.

5. AI AGENT

SCOPING CALL

Bhamchik Funnel Keeper

A named AI employee that works the funnel between the sales manager and the staff. Trigger: every morning at 8 AM and every time a lead changes stage. It chases the stuck leads, keeps the visit calendar full, and reports to the sales manager and the owner.

- Trigger: 8 AM daily, and on any lead moving stage in the CRM.
- Reads the Funnel Board, lists every lead with an overdue follow-up and sends each staff member their own list on WhatsApp before the day starts.
- Reads lead replies on the WhatsApp API, answers project questions from the Bhamchik Second Home Sales Skill, and hands any price or payment question to the owner without answering.
- Watches quotations past their normal age in the 2 to 3 month cycle and drafts a nudge for the sales manager to approve and send.
- After handover, it runs the retention calendar: possession anniversary message, new launch note, referral ask, and logs the reply.
- Reports at 6 PM to the sales manager and the owner: leads touched, visits booked, follow-ups missed by name, quotations waiting for the owner, and buyers who asked for a price or discount.

REPLACES

The owner personally tracking every deal and the sales manager chasing staff for follow-up status by phone.

> OWNER APPROVES Any reply that touches price, discount, payment plan or token amount is drafted and parked. The owner approves it in the 6 PM report before it goes out.

PROBLEM 3 OF 3

One Bhamchik Desk for the whole company

> *“I want to do one central dashboard for my company to organize everything from one dashboard - like employee login to dashboard user ID and password and work on that easy to access all things in that dashboard”*

9 AM TOMORROW At 9 AM tomorrow each of your 15 people opens Bhamchik One Desk with their own ID, sees only the pages meant for their role, and you see on one screen who is in office, who is on site, and what is pending before you make a single call.

FIVE WAYS TO ATTACK IT

1. CLAUDE SKILL

Bhamchik Roles and Access SOP

Writes down, once, who in Bhamchik does what, what each role may see, and how a working day is opened and closed from the desk.

- Encodes the three levels you described: you, the sales manager, and staff, with office and on-site work treated differently.
- Lists which pages each role opens: staff see their own tasks and site visits, the sales manager sees the team view, you see everything including the finance and sales pages built under Problems 1 and 2.
- Drafts the one-page joining note for a new employee: their ID, their first login, the rule that passwords are never shared on WhatsApp.
- Drafts the daily desk routine: log in by a set time, mark work done before leaving, raise a flag if blocked.
- Written in plain Hindi-English so staff on site can read it on a phone.

REPLACES

You explaining the same instructions by voice to each new person, and every doubt coming back to you.

DIFFICULTY

Easy

CONFIDENCE

High

CONSERVATIVE SAVING

4 hours a month

> **OWNER APPROVES** You sign off the role sheet before it goes live, and you alone decide which roles may see finance pages.

2. MICRO-APP

Bhamchik Login Desk

A small tool that creates a user ID and password for each employee and hands them their own task page.

- Input: name, role, office or site, mobile number. Output: a user ID, a first-time password, and the set of pages that role is allowed to open.
- Each employee sees a short task list for the day and ticks items done from a phone, so on-site staff do not need to come to office to report.
- Leaving staff are switched off in one click so an old login never stays open.
- Keeps a simple log: who logged in, when, and from where.
- Does not store any price, token amount or payment figure; those stay inside the finance and sales systems and are only linked, not copied.

REPLACES

No login today. Work is tracked by calling people and asking.

DIFFICULTY

High

CONSERVATIVE SAVING

8 hours a month

> OWNER APPROVES Every new login and every change of role is approved by you before it is created.

3. DASHBOARD

Bhamchik One Desk

The central dashboard you asked for: one screen, one login, and everything that today lives in your head and your phone.

- Top strip: how many of the 15 are logged in, who is in office, who is on site, who has not opened the desk today.
- Middle: each employee's open items, overdue items, and site visits scheduled, pulled from the sales and finance boards without rebuilding them here.
- Side panel: links that open the finance board, the sales funnel board, and the WhatsApp API and portal you already pay for, so nobody searches for tabs.
- Owner view shows everything. Sales manager view shows the team. Staff view shows only their own page.
- What becomes visible that is invisible today: which person is actually behind on which step, without you auditing every deal yourself.

REPLACES

You personally handling every deal, operation and audit because there is no single place to look.

DIFFICULTY

Medium

CONFIDENCE

High

CONSERVATIVE SAVING

12 hours a month

> OWNER APPROVES You approve which figures from the finance board appear on the owner view and confirm that no money figure appears on any staff view.

4. AUTOMATION

Bhamchik Day Open and Close Routine

Opens the working day for every employee and closes it with one summary to you, without anyone being chased.

- Trigger: a fixed time each working morning.
- Step one: each employee's task page is refreshed with their open items from the sales and finance systems.
- Step two: anyone who has not logged in by a set time gets one WhatsApp reminder through the API you already use.
- Step three: in the evening, items not marked done are rolled forward and flagged, and a short day-close summary is sent to you and the sales manager.
- Step four: any request for a new login or a change of access is queued for you; nothing is created until you tap approve.

REPLACES

Morning calls to find out who is where, and evening calls to find out what got done.

DIFFICULTY

Medium

CONFIDENCE

CONSERVATIVE SAVING

10 hours a month

> OWNER APPROVES Creation of any user, change of any role, and any access to finance pages waits for your approval in the queue.

5. AI AGENT SCOPING CALL

Bhamchik Desk Keeper

A named AI employee who keeps the central desk tidy, answers staff on where things are, and tells you what is slipping.

- Trigger: runs every working day and whenever a task sits past its due time on any employee's page.
- Answers staff questions such as where to find a site visit list or how to mark a task done, so these questions stop reaching you.
- Nudges the right person once, politely, in Hindi or English as they prefer, when something is overdue.
- Reports every evening to you and the sales manager: who was active, what is overdue by person, which login requests are waiting.
- Reports every week a plain summary of where the team lost time, so you decide what to fix.
- Does nothing on price, payment, discount or any financial decision. It only points; you and the sales manager act.

REPLACES

You being the help desk, the reminder and the auditor for 15 people at the same time.

DIFFICULTY

Hard

CONFIDENCE

Medium

CONSERVATIVE SAVING

15 hours a month

> OWNER APPROVES Any suggestion the Desk Keeper makes that touches a deal, a payment or a person's access is sent to you and waits for your word.

ACROSS THE WHOLE BUSINESS

DEPARTMENT	TODAY	WITH THESE SYSTEMS
Sales	Leads come in crm, then our team manualy call to them, send details on WhatsApp by hand, do 5 to 6 follow-ups by hand, schedule visits by hand and prepare quotations by hand. The sales manager chases staff by phone and the owner checks every deal himself.	The Bhamchik Lead-to-Visit Flow sends details within minutes, runs the follow-ups and books visits. The Bhamchik Lead Qualifier tags each lead hot, warm or cold. The Bhamchik Funnel Keeper sends each staff member their overdue list at 8 AM and reports to the sales manager and owner at 6 PM. Quotations wait for the owner to fill the price.
Marketing	Meta ads and the portal bring the leads, but there is no view of which campaign brings buyers who actually visit a site, so spend is judged on enquiry count alone.	The Bhamchik Funnel Board shows cost per lead and cost per visit by campaign and by portal. The owner decides spend; the board only shows. Retention messages for the 10 percent who come back go out from the Bhamchik Second Home Sales Skill on a calendar.
Finance and accounts	No accounting system in our company. Token receipts are typed by hand, expenses are remembered later, salary and incentive are worked out from memory, and profit and loss is known only at year end. Payment reminders to customers are done by whoever remembers.	The Bhamchik Receipt and Ledger App enters each rupee once. The Bhamchik Payment Reminder Flow chases instalments on schedule. The Bhamchik Finance Board shows cash, dues and a running profit and loss. Bhamchik Munshi keeps the books each evening and drafts salary and incentive sheets; the owner signs every payment.
Operations and site	Work happens in office and on-site, with staff reporting by phone. Site visits are scheduled by hand and nobody knows who is where without asking.	Site visits are booked and confirmed by the flow with reminders to the buyer and the staff member. On-site staff tick tasks done from a phone on the Bhamchik Login Desk, and the owner sees who is in office and who is on site on Bhamchik One Desk.

DEPARTMENT	TODAY	WITH THESE SYSTEMS
HR and admin	Hr managment is manual. There are no employee logins, joining is explained by voice, salary and incentive are computed by hand, and leaving staff are not switched off anywhere because there is nothing to switch off.	The Bhamchik Roles and Access SOP sets who sees what. The Bhamchik Login Desk creates and removes IDs with owner approval. The Bhamchik Day Open and Close Routine opens and closes the day for everyone. Incentive sheets come drafted from closed deals and wait for the owner's signature.
Owner's desk	The owner personally handles every deal/operation/audit, is the help desk, the reminder and the auditor for 15 people, and gets 7 to 10 hours a week to build anything new.	The owner opens Bhamchik One Desk once in the morning and reads three evening notes: from Bhamchik Munshi on cash and gaps, from the Bhamchik Funnel Keeper on the funnel, and from the Bhamchik Desk Keeper on the team. The owner's time goes to price, financial decisions and the deals that are stuck.

STAYS HUMAN

- Pricing and negotiation
- Who works at Bhamchik: hiring, letting go, changing a person's role or access, and writing the incentive rules themselves stay with the owner and the sales manager.
- Final sign-off on money leaving the business

FIRST 90 DAYS

01 Weeks 1 to 3: write the Bhamchik Second Home Sales Skill with the sales manager and switch on the Bhamchik Lead-to-Visit Flow on the existing CRM and WhatsApp API, with quotations stopping at the owner for price.

02 Weeks 3 to 6: build the Bhamchik Receipt and Ledger App and start the Bhamchik Payment Reminder Flow, so every token and instalment from

12 MONTHS

01 Months 4 to 6: bring in Bhamchik Munshi for evening bookkeeping and the monthly salary, incentive and profit and loss drafts, with the CA checking the first two month-ends.

02 Months 5 to 7: switch on the Bhamchik Funnel Keeper to work the overdue follow-ups and the retention calendar, and the Bhamchik Lead Qualifier to tag every incoming lead.

this point is receipted and chased from one place.

03 Weeks 6 to 9: put the Bhamchik Funnel Board and the Bhamchik Finance Board live for the owner and the sales manager, and write the Bhamchik Roles and Access SOP.

04 Weeks 9 to 12: create logins for all 15 people on the Bhamchik Login Desk and run the Bhamchik Day Open and Close Routine, so everything is in place before DEC.

03 Months 7 to 9: finish Bhamchik One Desk with the owner, manager and staff views, and add the Bhamchik Desk Keeper so staff questions stop reaching the owner.

04 Months 9 to 12: review the funnel against your own figures of 10 to 15 quotes and 6 orders a month, tune the follow-up script and the Meta spend view, and only then look at whether the same desk can carry handcraft and construction.

Taken at their most conservative, the rupee savings on these pages come to about ₹76,000 a month, before counting the hours that come back to you and your 15 people.
