BHAMCHIK GROUP · KOKAN NIRVANA AI SYSTEMS BLUEPRINT · REV B

One second-home brand, Kokan Nirvana Seashore property. 800 to 1000 leads a month, every call, message, visit and receipt done by hand. One Real Estate OS on Shubham's own code: a foundation and eight systems in four phases over twelve weeks, the lead flow first.

PREPARED FOR
SHUBHAM MANJUNATH ANVEKAR, OWNER
BLUEPRINT AUDIT 07.11.2026
WORKING CALL 09.11.2026
REV B SUPERSEDES REV A

01 THE NUMBERS

DASHBOARD TILES · AS PROVIDED BY CLIENT

800 to 1000	10 to 15	20 to 30	6	3000000	2 to 3 month	10%	15	50,000
LEADS A MONTH	QUOTES A MONTH	OUT OF 100 QUOTES, ORDERS	ORDERS A MONTH	AVERAGE ORDER VALUE	SALES CYCLE	REPEAT CUSTOMERS	TOTAL HEADCOUNT	META ADS A MONTH (CALL-ONLY, CURRENCY TO CONFIRM)

800 to 1000 leads become 10 to 15 quotes: **roughly one or two in a hundred reach a quotation**, *and nothing today shows which Meta spend brings the buyers who visit. Three of the form's figures do not sit together; section 05 lists them for Shubham to settle.*

02 THE MONEY PATH TODAY

FLOWCHART · ENQUIRY TO FINAL PAYMENT

01	02	03	04	05	06	07
Come in CRM	**Send details by watspp**	**5 to 6 follow up**	**Shedual to visit**	**Quotation**	**Token receipt**	**All follow up**
meta, landing page, portal	typed by hand, no tutorial	call and whatsapp, from memory	phone calls, no calendar	price stays with the owner	typed by hand, no ledger	instalments, whoever remembers

☐ NAMED BREAKDOWN POINT ☐ RUNS, BUT BY HAND SEVEN STATIONS, SEVEN BY HAND: "MANUALLY PHONE, MANUALLY MESSAGE, MANUALLY RECEIPT"

03 WHERE THE VOLUME GOES

FUNNEL

THE STEEP DROP IS THE FIRST STEP: LEAD TO QUOTATION

EVERY LEAD GETS THE SAME HAND-TYPED TREATMENT, SO SPEED AND THE TUTORIAL ARE THE FIRST LEVERS.

04 WHO HOLDS THE WORK

PYRAMID · ORG LAYERS

FINANCE, HR AND AUDIT LAND ON THE OWNER

EACH SYSTEM PUTS A NAMED PROCESS WHERE A MANAGER WOULD OTHERWISE SIT.

05 WHAT WAS TRIED, AND WHAT CHANGES

BEFORE / AFTER · WHY REV B EXISTS

TRIED

ChatGPT, Base44, Cloud, Gemini

Was: "all trending AI tools" opened, none wired to the CRM, WhatsApp API or Meta ads. Nothing on the money path changed.

Now: one Real Estate OS in Shubham's own code and database, built by him in Claude Code, step by step with Romana.

REV A

A blueprint that read generic

Was: on the 09.11 call Shubham said the depth of his plan had not come through: the brand, the tutorials, the whole sales process.

Now: Kokan Nirvana is named, property tutorials get their own system, and Meta and the landing page feed one record.

MANUAL

Phone, message, receipt

Was: "manually phone, manually message, manually receipt" for every visit and every token.

Now: the flow sends details, tutorials, reminders and receipts; people make the calls and every price decision.

Tools failed here because nothing was connected, so **the build starts with one record that every system reads**, *not with another tool.*

07 IMPLEMENTATION ROADMAP

GANTT · 4 PHASES · TWELVE WEEKS FROM 10.11.2026

PHASE	P1 · LEADS TO VISITS, BY THEMSELVES		P2 · EVERY RUPEE RECEIPTED	P3 · THE TWO BOARDS		P4 · ONE DESK FOR 15
SYSTEM	WK 1-2	WK 3-4	WK 5-6	WK 7-8	WK 9-10	WK 11-12
F-00 Single Record	One record, CRM imported					
SYS-01 Lead-to-Visit Flow	Meta + landing page in, details out in minutes					
SYS-02 Property Tutorial Library	One tutorial pack per property					
SYS-03 Second Home Sales Skill	Script signed					
SYS-04 Receipt and Ledger App		Every rupee entered once				
SYS-05 Payment Reminder Flow			Instalments chased			
SYS-06 Funnel Board				Leads to orders, cost per visit		
SYS-07 Finance Board				Cash, dues, P&L daily		
SYS-08 Team Desk					15 logins, day opens and closes	

P1 DONE WHEN
Every Meta, landing-page and portal lead is one record within minutes · details and the right property tutorial sent without staff typing · follow-ups and visit date on the record · every quotation waits for the owner's price.

P2 DONE WHEN
Every token and instalment from week 5 has a numbered receipt sent after a tick, a ledger entry and an updated unit outstanding · every instalment due is reminded without staff sending it.

P3 DONE WHEN
At 9 AM the owner and sales manager see leads by campaign, cost per visit, overdue follow-ups, quotation age, cash, dues and the month's P&L without a phone call.

P4 DONE WHEN
All 15 have their own login and pages · the day opens and closes with one summary · manual chq report, quotation, follow up and deal tracking no longer sit with a person.

08 WHY THIS BUILD ORDER 2×2 MATRIX

HIGH IMPACT · RUNS WITHOUT ANYONE CHANGING

- F-00 Single Record
- SYS-01 Lead-to-Visit Flow
- SYS-02 Property Tutorial Library

→ BUILD FIRST · PHASE 1

HIGH IMPACT · NEEDS PEOPLE TO CHANGE

- SYS-03 Second Home Sales Skill
- SYS-04 Receipt and Ledger App

→ THE SALES MANAGER'S SCRIPT, STAFF ENTERING RECEIPTS

COMPOUNDING · NEEDS CLEAN DATA

- SYS-05 Payment Reminder Flow
- SYS-06 Funnel Board
- SYS-07 Finance Board

→ AFTER THE RECORD AND THE LEDGER HOLD

GROWTH · UNBLOCKS SCALING

- SYS-08 Team Desk

→ LAST, SO THE DESK OPENS ONTO BOARDS WITH FIGURES

← LOW DEPENDENCE ON HUMAN CHANGE — HIGH →

Phase 1 ships the systems that run on leads already arriving and need **nobody to change how they work**. *The Sales Skill runs beside them as a writing lane, because the flows read its words.*

09 GUARDRAILS SWIMLANE · SET BY SHUBHAM

AI ACTS ALONE	MANAGE SALE FUNNEL · GENERATE AI AGENT FOR MANAGE ALL THIS WITH POSSIBLE
HUMAN SIGNS OFF	PRICE OR ANY FINANCIAL DECISION
NEVER AUTOMATED	NOT SET: THIS ANSWER WAS LEFT BLANK CAREFUL DEFAULT: HIRING, LETTING GO, ROLE OR ACCESS CHANGES, INCENTIVE RULES STAY WITH THE OWNER AND SALES MANAGER

Every flow stops at price, discount, payment plan, token amount, salary, incentive and any payment: it drafts, parks and waits. **Running costs are listed system by system** *in the Systems, Costs and Automation Guide that ships with this revision.*

10 NEXT STEPS IMMEDIATE ACTIONS

01 **Confirm or correct Rev B,** especially the Meta spend currency, what "before DEC" means, and the three figures in section 05. Owner.

02 **Buy Claude Max and hold the build** until the live setup session with Romana; laptop and connection ready. Owner.

03 **Gather one tutorial pack per property:** photos, a phone walkthrough, location, unit list, brochure. Owner with sales manager.

04 **Export the CRM leads and name the CRM;** give admin access to Meta ads, the landing page form and the WhatsApp API provider. Owner.

05 **Dictate the sales script:** first reply, 5 to 6 follow-ups, visit pitch, objections, in weeks 1 to 2. Sales manager.

06 **Write the instalment schedule, receipt format and incentive rules** before week 3; P2 cannot start without them. Owner.

07 **Decide the third guardrail,** what is never automated, in your own words. Owner.

SHEETS 1–3 ARE THE ONE-SHOT CAPTURE · EVERY RECOMMENDATION TRACES TO THE SOURCES ABOVE

00 EXECUTIVE SUMMARY

OVERVIEW

"Need to do sales and marketing setup for our company. CRM setup needs to do crm of my own and a follow-up system for customers, from generating leads to handing over the product to the customer retention process." Shubham wrote that in his Systems Brief, and on the working call of 09.11.2026 he made it specific: the business is **Kokan Nirvana Seashore property**, a second-home brand inside Bhamchik Group, and what he wants is a real estate operating system that runs the whole sales process (paraphrase), with a tutorial for every property, "पूरा एटोमेटेड".

Today 800 to 1000 leads a month arrive from Meta ads, the landing page and the portal, and every one of them is worked by hand: "विजिट के लिए हम मैन्योली फोन लगाते मैन्योली मैसेज करते मैन्योली रिसिट बेजते". Ten to fifteen of them reach a quotation. There is no accounting system, no login for the 15 people, and the owner personally handles every deal, operation and audit.

This revision makes five structural changes, each traceable to the 09.11 call: (1) the brand and the goal are named, and every system now serves Kokan Nirvana; (2) a new system, the **Property Tutorial Library**, carries the tutorials he asked for; (3) the build is his own Real Estate OS in his own code and database, so the record becomes "crm of my own" and the current CRM runs beside it until the new one holds; (4) **n8n** becomes the automation layer for Meta leads, WhatsApp sends and schedules; (5) Rev A's Login Desk and Day Open and Close Routine merge into one **Team Desk** for HR. The result is one foundation and eight systems in four phases over twelve weeks, with the lead flow live in weeks 1 to 3, inside his "before DEC" anchor.

It is built by Shubham himself, on his own Claude Max subscription, with several Claude Code sessions running side by side, one per system. Three companion documents ship with this revision: the Starter Guide (day 1, with Romana), the Continue Building Guide (every sitting after), and the Systems, Costs and Automation Guide (what each system costs to run, how the AI agents are built, and what n8n automates).

01 WHAT CHANGED SINCE REV A

DELTA RECORD

Rev A's current state (money path, funnel, people map, tools tried) remains valid and is carried in panels 01 to 05. This section records only what is new on file from the working call of 09.11.2026. The call ran in Hindi, Marathi and English and its transcript is garbled in places; quotes below are verbatim where the transcript is clean, and marked *(paraphrase)* where it is not.

1.1 The brand and the goal, named *(call-only)*

"So I focus the real estate, which is Kokan Nirvana Seashore property. So that second home selling business for real estate." Bhamchik Group holds real estate, handcraft, construction and a rent-out facility the group is "going to explore"; Shubham's focus is Kokan Nirvana. The transcript renders the location being promoted as "Dappul"; the spelling is for Shubham to confirm. What he asked for is one system for the whole sales process, an operating system for this one brand (paraphrase). Rev A described a generic second-home funnel; Rev B names the brand on every system.

> PAIN
> "Shubham's blueprint is too generic for his specific goal" (call summary): the depth of the plan in his head did not reach Rev A.

1.2 The sales path, in his words

The call confirms Rev A's seven stations and says plainly which ones hurt: "अभी हम लोग सब मैन्योली रे रहे", then "विजिट के लिए हम मैन्योली फोन लगाते मैन्योली मैसेज करते मैन्योली रिसिट बेजते". The visit is set up by phone, the details go by hand-typed message, and the receipt is made and sent by hand. These map to stations 02, 04 and 06 on panel 02.

> PAIN
> Every one of 800 to 1000 leads a month is phoned, messaged and later receipted by hand, so speed depends on who is free.

1.3 Property tutorials, new *(call-only)*

"हर एक प्रॉपर्टी का टिटोरियल बनाऊंगा और पूरा एटोमेटेड रहेगा": a tutorial for every property, and fully automated. This is new since Rev A, where project details were a WhatsApp message. Rev B gives it its own system (SYS-02): each property has one approved pack, and the Lead-to-Visit Flow sends the right pack at the right step without anyone typing.

> PAIN
> A second-home buyer decides from far away; today the only material reaching them is whatever a staff member types that day.

1.4 Where the leads come from: Meta ads and a landing page *(call-only)*

The call adds two facts. A landing page exists ("We have landing page."), and Meta ads run at "month of $50,000 investment". The transcript writes the currency as dollars; for a ₹10 to 50 lakh a month business that is far more likely to be ₹50,000, and it is listed in section 05 to confirm, not corrected here. Either way, nothing today shows which campaign brings buyers who actually visit, which is what SYS-06 is for.

1.5 The build model: his own Claude Max, several sessions at once *(call-only)*

Shubham builds the OS himself in Claude Code, with Romana guiding the first setup live on a shared screen, and does not start before that session. The call agreed a Claude Max subscription for the first month, because Max allows several Claude Code sessions to run together without stalling, and Pro would run out after a couple of sessions (paraphrase). **Correction to the record:** the call summary states the Max plan at "$10,000/month". Claude Max is billed at about $100 a month (Max 5x) or $200 a month (Max 20x), roughly ₹10,000 or ₹20,000 with GST, so the summary's figure reads as rupees, not dollars. The Systems, Costs and Automation Guide carries the exact line.

1.6 Tools already paid for *(call-only)*

Beyond Rev A's list (ChatGPT, Base44, Cloud, Gemini), the call confirms a running **Base44** subscription ("just have a subscription. base 44") and no Claude subscription yet. Base44 is a no-code app builder; this build does not use it, so whether to keep paying is Shubham's decision after Phase 1.

1.7 One centre for leads, HR and accounting *(call-only)*

The call returns to the form's central dashboard: lead management, HR and accounting in one place, every employee logging in to their own page (paraphrase), and on accounts, "Accounting is not happening." Rev A already carried this across its finance and desk systems. Rev B keeps them and merges the two desk systems into one Team Desk, because they share one login and one daily routine.

1.8 n8n as the automation layer

BuildOur's notes of the call record that Shubham wants to automate with n8n; the transcript does not carry the word legibly, so this rests on those notes. Rev B adopts it where it fits: n8n runs the pipes (Meta lead intake, WhatsApp

sends, schedules, reminders), the app holds the record and the screens, and anything that calculates money stays in tested code. Claude Code writes each n8n workflow as a file Shubham imports.

02 RECOMMENDED AI SYSTEMS

FOUNDATION + 8 SYSTEMS

KOKAN NIRVANA SINGLE RECORD

F-00 · FOUNDATION

WHAT IT IS	The Real Estate OS's one database: every lead, property, unit, site visit, quotation, token, instalment, receipt and staff member, each stored once and linked. `lead → property → visit → quotation → token → instalments → handover` . The current CRM's leads are imported once, and the CRM runs beside the OS until the new record holds.
WHY FIRST	"CRM setup needs to do crm of my own". Every later system reads and writes this record; built once, it lets several systems be built at the same time without each keeping its own copy.
OPEN INPUT	The CRM's name, and an export of its leads (section 06).

KOKAN NIRVANA LEAD-TO-VISIT FLOW

SYS-01 · FIRST DOMINO

WHAT IT DOES	A new lead from Meta lead ads, the landing page form, the portal or a walk-in becomes a record within minutes. The WhatsApp API sends the project details and the matching property tutorial in the Kokan Nirvana script, and a call task lands with the assigned staff member. The 5 to 6 follow-ups go out on set days and pause when the lead replies. When the lead says yes to a visit, slots are offered, booked, confirmed and reminded the day before. After the visit, the quotation is drafted with the price line blank and parked for the owner. `lead → details + tutorial → call task → follow-ups → visit → quotation parked`
SOLVES	§1.2: "मैन्योली फोन लगाते मैन्योली मैसेज करते"; Rev A station 02 to 04.
GUARDRAIL	No price, discount, payment plan or token amount is ever set by the flow; the owner fills the price and taps approve. Messages use only templates the owner has signed.
BUILD	App screens and record in Next.js and Supabase; Meta intake, WhatsApp sends and the follow-up schedule in n8n.

KOKAN NIRVANA PROPERTY TUTORIAL LIBRARY

SYS-02 · NEW IN REV B

WHAT IT DOES	One tutorial pack per property: a short walkthrough video (recorded on a phone, or produced with an AI video tool if Shubham chooses), location and distance from the city, unit or plot options, maintenance and rental-yield answers, and FAQs. AI drafts the script and the FAQ from the brochure and the Sales Skill; the owner approves each pack once. The Lead-to-Visit Flow sends the right pack automatically: on first contact, before a visit, and to a quiet lead. `property → pack drafted → owner approves → sent by the flow → opened? logged`
SOLVES	§1.3: "हर एक प्रॉपर्टी का टिटोरियल बनाऊंगा और पूरा एटोमेटेड रहेगा".
GUARDRAIL	No price, offer or payment plan appears in any pack; those stay in the quotation the owner fills.
OPEN INPUT	The list of Kokan Nirvana properties and their material (section 06, step 03).

KOKAN NIRVANA SECOND HOME SALES SKILL SYS-03

WHAT IT DOES	The written sales rulebook the flows read: the questions for a new lead, the first WhatsApp reply, the 5 to 6 follow-ups spaced across the 2 to 3 month cycle, the visit pitch, the post-visit note, the handover checklist, the retention touches for the 10% who come back, and Kokan Nirvana's answers to the second-home objections (maintenance, rental yield, distance from the city).
SOLVES	Rev A: each staff member writing their own WhatsApp messages from memory, with no fixed script from lead to handover.
GUARDRAIL	Any price, offer or payment plan in a drafted message is typed in by the owner or sales manager before it goes out.
ADOPTION	Two or three hours of the sales manager dictating in weeks 1 to 2. It is a writing lane: it runs in its own session beside the code from day 1.

KOKAN NIRVANA RECEIPT AND LEDGER APP SYS-04

WHAT IT DOES	When money lands in the Bhamchik bank account and the owner or sales manager ticks it, the receipt is entered once: customer, unit, amount, mode, date. A numbered receipt PDF goes out on WhatsApp, the credit is posted to the ledger and the unit's outstanding updates. Salary, incentive, brokerage, site and office expenses are entered with a photo of the bill. `money lands → tick → entered once → receipt sent → ledger + outstanding`
SOLVES	§1.2 "मैन्योली रिसिट बेजते"; §1.7 "Accounting is not happening."; the form's "No accounting system in our company".
GUARDRAIL	A receipt is generated only after a person ticks that the money has actually landed. Receipt numbers and totals are calculated by tested code, never by AI.

KOKAN NIRVANA PAYMENT REMINDER FLOW SYS-05

WHAT IT DOES	Runs off each unit's instalment schedule in the ledger. Before a due date it checks nothing has been received, sends the reminder with name, unit, amount and date on WhatsApp, sends a second reminder if the date passes and flags the unit to the sales manager and owner, and stops the moment a receipt is generated.
SOLVES	Rev A station 07: instalment follow-up by whoever remembers.
GUARDRAIL	Any extension, waiver, late charge or change to an amount is never sent by the flow; the owner writes it.
OPEN INPUT	The standard instalment schedule for a sale (section 06, step 06).

KOKAN NIRVANA FUNNEL BOARD — SYS-06

WHAT IT DOES	One screen for the owner and sales manager: leads by Meta campaign, landing page and portal; calls made, tutorials sent and opened, visits booked, quotations out and their age; overdue follow-ups by staff name; handovers and retention touches due; cost per lead and per visit by campaign, read from the Meta ad account.
SOLVES	§1.4 and Rev A: no view of which campaign brings buyers who visit; the owner checking every deal by phone.
GUARDRAIL	Any change to Meta ad spend is made by the owner, never by the board.

KOKAN NIRVANA FINANCE BOARD — SYS-07

WHAT IT DOES	Built on the ledger: cash in bank, money due this week and month unit by unit, salary and incentive owed, brokerage and site bills, a running profit and loss for the month, and a red mark wherever the ledger and the bank disagree.
SOLVES	The form's "all credit debit entry / profit & loss" and the owner auditing every deal personally.
GUARDRAIL	Nothing moves from the board. Any payment, release of incentive or change to a schedule happens only when the owner marks it approved.
OPEN INPUT	The incentive rules, written and signed once before any incentive figure is drafted.

KOKAN NIRVANA TEAM DESK — SYS-08 · MERGED IN REV B

WHAT IT DOES	The roles and access sheet, signed by the owner (owner, sales manager, staff; office and on-site); a login for each of the 15 with only their own pages; a task page refreshed each morning; one WhatsApp nudge to anyone not logged in by the set time; undone items rolled forward each evening and a day-close summary to the owner and sales manager; leaving staff switched off in one click. Merges Rev A's Login Desk and Day Open and Close Routine.
SOLVES	The form's "one central dashboard for my company... employee login to dashboard user ID and password" and §1.7.
GUARDRAIL	Every new login, role change and access to finance pages waits for the owner's approval. No staff page shows a money figure.

NOTE: THE EXISTING STACK

WhatsApp API: kept; every customer message goes from it. **Meta ads:** kept; leads come in through n8n and spend is read for the Funnel Board. **Portal and landing page:** kept as lead sources; their forms feed the record. **Current CRM:** runs beside the OS until the new record has held for a full month, then Shubham decides whether to keep paying. **Base44:** paid, not used in this build; keep or cancel after Phase 1. **ChatGPT, Gemini:** not part of the build. **Added:** Claude Max (to build), GitHub (code), Supabase (database), Vercel (app online), n8n (automations).

AI EMPLOYEES · MONTHS 4 TO 9, AFTER THE RECORD IS CLEAN

Carried from Rev A, unchanged in purpose: **Lead Qualifier** (tags each lead hot, warm or cold on rules the sales manager sets), **Funnel Keeper** (8 AM overdue lists per staff member, reads lead replies, answers project questions from the Sales Skill, 6 PM report), **Munshi** (evening bookkeeping, monthly salary and incentive drafts, P&L draft), **Desk Keeper** (answers staff on where things are, nudges once, evening report). Each runs on the Claude API, billed apart from Claude Max; how they are built and what they cost is in the Systems, Costs and Automation Guide.

DEFERRED BY CLIENT DECISION · PARKED, NOT DROPPED

D-01 HandCraft and Construction. "BUT I M DOING FOR REAL ESTATE". Re-entry: after month 9, only once the Funnel Board has been reviewed against the owner's own figures. **D-02 Rent-out facility.** Named on the call as "going to explore". Re-entry: when Shubham decides to start it; the Single Record is built so it can carry rentals later.

03 IMPLEMENTATION ROADMAP

4 PHASES · BEFORE DEC FOR PHASE 1

Sequenced for **7 to 10 hours a week** of the owner's time, the form's anchor **before DEC**, and a build that Shubham runs himself in Claude Code from the live setup on 10.11.2026. The critical path is the Single Record: no system can be built until its core tables exist, which takes the first sittings of week 1. After that, Claude Max lets him run up to three sessions side by side, one per system, so P1's three systems are built together and land in weeks 1 to 3. The sales manager is the second person the plan depends on, for the script in weeks 1 to 2.

P1 LEADS TO VISITS, BY THEMSELVES

F-00 + SYS-01 + SYS-02 + SYS-03 · WEEKS 1–3

Why first: it runs on the 800 to 1000 leads already arriving, needs nobody to change how they work, and removes the most hand work on the sheet. Messages are drafted for approval in week 1 and go out on their own only after five real leads have passed.

DONE WHEN Every new lead from Meta, the landing page and the portal exists as one record within minutes, has received the project details and the right property tutorial on WhatsApp without staff typing, and its follow-ups and visit date are visible on that record; every quotation is parked waiting for the owner's price.

P2 EVERY RUPEE RECEIPTED AND CHASED

SYS-04 + SYS-05 · WEEKS 3–6

Needs the instalment schedule, receipt format and incentive rules from the owner before week 3, and one named person on staff who enters receipts and expenses.

DONE WHEN Every token and instalment received from week 5 onward has a numbered receipt sent after a tick, a ledger entry and an updated unit outstanding, and every instalment due has been reminded on WhatsApp without a staff member sending it.

P3 THE TWO BOARDS THE OWNER ASKED FOR

SYS-06 + SYS-07 · WEEKS 7-10

Two read-only boards on data the first two phases already write; they build well side by side in two sessions.

DONE WHEN The owner and sales manager open the Funnel Board and the Finance Board at 9 AM and see leads by campaign, cost per visit, overdue follow-ups, quotation age, cash in bank, dues and the month's profit and loss without a single phone call.

P4 ONE DESK FOR ALL 15

SYS-08 · WEEKS 9-12

Last, so the desk opens onto boards that already carry figures; the roles sheet is signed first.

DONE WHEN All 15 people have their own login and see only their role's pages, the day opens and closes with one summary to the owner, and the owner can point at the desk and say this is the big thing we started: manual chq report, quotation, follow up and deal tracking no longer sit with a person.

04 GUARDRAILS

SET BY SHUBHAM, ENFORCED BY DESIGN

ALWAYS HUMAN SIGN-OFF: "PRICE OR ANY FINANCIAL DECISION".

AI MAY ACT ALONE ON: "MANAGE SALE FUNNEL" · "GENERATE AI AGENT FOR MANAGE ALL THIS WITH POSSIBLE".

NEVER AUTOMATED: NOT ANSWERED. The careful default applies until Shubham writes his own: hiring, letting go, changing a person's role or access, and writing the incentive rules stay with the owner and sales manager.

CUSTOMER-FACING: not stated on the form. Until it is, customers receive only messages from templates the owner has signed, and nothing carrying a price, discount, payment plan or token amount goes out without a person.

ERROR PROTOCOL: every action the system takes is written to a log nobody can edit; one switch turns all automatic sending off without code; a wrong message is fixed by changing the template, tested on five leads, then switched back on.

05 THE NUMBERS

FLAGGED, NOT RESOLVED

(1) **Quotes and orders:** 10 to 15 quotes a month at 20 to 30 out of 100 gives roughly 2 to 4 orders, not the 6 stated. (2) **Order value and turnover:** 6 orders at 3000000 each is about ₹1.8 crore a month, outside the ₹10 to 50 lakh band ticked on the form; either the order value, the order count or the band is off, or the figure counts booking value rather than money received. (3) **Leads to quotes:** 800 to 1000 leads producing 10 to 15 quotes is one or two in a hundred; not a contradiction, but the number that decides the first build. (4) **Meta spend, new:** "month of $50,000 investment" on the call; confirm the currency. (5) **Deadline, new:** "before DEC" with a twelve-week build from 10.11.2026; if DEC means

December 2026, Phase 1 meets it and the rest follows; confirm. (6) **Headcount:** 15, against a people map of one owner, one sales manager and staff; the split by role is not stated.

The funnel is steepest at the very first step, which is why Phase 1 is speed and material at first contact: the details and the tutorial within minutes, not a better quotation.

06 NEXT STEPS

DETAIL BEHIND PANEL 10

Panel 10 carries all seven actions; the three below need detail the panel could not hold, numbered as on the panel.

02 **Before the live setup:** Claude Max bought on the business email (Max 5x to start; move to Max 20x only if three sessions at once keep hitting the limit), laptop charged, a stable connection, the business email open, and the Rev B PDF and Starter Guide PDF downloaded. Do not start the setup alone; it runs on the call with Romana. Owner.

03 **One tutorial pack per property,** in a folder per property: name and location, distance from the city, unit or plot list with sizes (no prices), 10 to 20 photos, a 2 to 3 minute phone walkthrough video, the brochure PDF, and the five questions buyers ask most. Owner with sales manager.

04 **Data and access:** an export of the current CRM's leads as Excel or CSV (name, phone, source, campaign, date, stage, staff member, notes) and the CRM's name; admin access to the Meta ad account and lead forms; the landing page's form or the tool it is built on; the WhatsApp API provider's name, login and the message templates already approved. Owner.

EVERY ITEM IN THIS DOCUMENT TRACES TO THE SYSTEMS BRIEF, THE REV A BLUEPRINT AUDIT (07.11.2026) OR THE WORKING CALL OF 09.11.2026 (RECORDING AND SUMMARY).
NO FIGURES ADDED BEYOND THOSE THE CLIENT PROVIDED; UNKNOWNS ARE NAMED, NOT GUESSED. REV B SUPERSEDES REV A IN FULL.
