GREATISH OS
CONTINUE BUILDING

AJAY KUMAR JI KE LIYE. STARTER GUIDE KE BAAD KI HAR SITTING: **EK SAATH KAI CLAUDE CODE SESSIONS**, HAR SYSTEM KA APNA SESSION, AUR SABKO JODNE WALA EK **MAIN SESSION**. FIELD SALES SABSE PEHLE.

MAIN SESSION -- **BUILDER SESSIONS** -- PHONE PAR TEST -- PAANCH ASLI CASES -- MERGE, LIVE -- AGLA SYSTEM

KAB USE KARNA HAI

Jab Starter Guide ke Step 4 ke saare box tick ho jaayein. Ye file `docs/` mein rakho, aur har sitting ki shuruaat mein section 02 par wapas aao. Har nayi screen ke look ke liye Starter Guide ka section 03 khula rakho.

IDEA KYA HAI

Aapki company mein departments ek saath chalte hain, ek owner ke neeche. Aapka project bhi waise hi: ek **MAIN session** (poori picture) aur zyada se zyada teen **builder sessions**, har ek apne system aur apni branch par.

AAPKA TIME

Hafte mein 1 se 2 ghante: approvals aur reports padhna. Sittings wo insaan karega jo Claude Code chalata hai.

SOURCES

Blueprint BOA-2026-GRE-01 Rev A.

HAR STEP PAR DO AWAAZ: AAP KARO · CLAUDE CODE MEIN PASTE KARO (PROMPTS HINGLISH MEIN, SYSTEM ENGLISH MEIN)

01 SESSIONS KAISE KAAM KARTE HAIN

EK BAAR PADHO

SESSION	KYA KARTA HAI	APP MEIN NAAM
MAIN (hamesha ek)	Master copy (`main`) rakhta hai, database ka maalik hai, poora hua kaam jodta hai, CLAUDE.md aur START-NOW update rakhta hai. Khud koi system nahi banata.	`MAIN`
Builder (teen tak)	Ek system banata hai, apni branch par, folder ki apni copy mein, sirf apni files chhoota hai. Phase poora hone par MAIN ko handover deta hai.	`SYS-01 Beat App` , `SYS-03 Store Gate` ...
Writing lane	Code nahi, shabd likhta hai: Field Day rules, batch record aur QC formats, department SOPs, HR letter templates. Formulation kabhi nahi.	`SKILLS writing`

SESSION KE BUTTONS

Claude app ke **Code** tab mein, jab ek session kaam kar raha ho tab bhi usi `greatish-os` folder par **naya session** shuru kar sakte ho; har session left side ki list mein dikhta hai, click karke switch karo. Har session ka naam uske kaam par rakho.

GADBAD KYUN NAHI HOTI

Har builder code ki apni copy (**worktree**) mein apni **branch** par kaam karta hai, isliye do sessions kabhi ek hi file mein type nahi karte. Har branch ka Vercel par apna test address hota hai, to system live app tak pahunchne se pehle phone par check ho jaata hai. Live copy mein kaam sirf MAIN jodta hai.

EK SAATH TEEN, ISSE ZYADA NAHI. Teen builders utne hi hain jitne ek insaan ek sitting mein follow, test aur answer kar sake. Agar sessions limit ki wajah se rukne lagein, to do chalao.

02 HAR SITTING

ROZ KA SAME ROUTINE

1

MAIN MEIN PASTE KARO

Din shuru karo. Claude app → Code → aapka `MAIN` session, aur ye paste karo:

PASTE · MAIN · HAR SITTING KI SHURUAAT

Tum GREATISH OS ke MAIN session ho. CLAUDE.md, docs/START-NOW.md, docs/SESSIONS.md, docs/handovers/, docs/requests/ aur docs/sessions/ ka latest note padho. Mujhe simple Hinglish mein, das lines ya kam mein batao: START-NOW mein kya abhi tick nahi hua; kaunse systems chal rahe hain aur kis branch par; koi handover merge ke wait mein hai kya; koi request tumhare wait mein hai kya; kya kuch Ajay ji ki approval ka wait kar raha hai; aur aaj mujhe kaunse builder sessions chalane chahiye (zyada se zyada teen). Jab tak main OK na bolun, aur kuch mat karna.

2

AAP KARO

Jo sessions MAIN ne bataye, wo kholo. Agar us system ka session pehle se hai, to use click karke §03 ka **continue** box paste karo; nahi hai to naya session shuru karo, naam rakho, aur **new system** box paste karo.

3

AAP KARO

Sessions ka round lagao. Jo session wait kar raha ho uska jawab do. Har session ek sitting mein ek chhoti poori cheez banata hai aur apna test address deta hai. Use phone par kholo aur ek asli executive, dukaan, batch ya task se check karo. Har nayi screen Starter Guide ke section 03 se check karo.

4

HAR SESSION MEIN, PHIR MAIN MEIN

Din band karo. Har builder mein: `Apni branch commit aur push karo, handover file aur aaj ka note update karo.` Phir MAIN mein: `Aaj ke handovers padho. Jo ready hai use merge karo, uske migrations order mein lagao, aur batao live app par kya badla.`

03 SESSION PROMPTS

BUILDER SESSION MEIN PASTE KARO

Brackets ko §05 se bharo, jaise **SYS-01 GREATISH Beat App** aur `sys-01-beat-app` .

PASTE · NAYA BUILDER SESSION (BRACKETS §05 SE BHARO)

Tum GREATISH OS mein **[SYS-0N aur system ka naam]** ke builder session ho. Mujhse simple Hinglish mein baat karo; code, files aur screens English mein. CLAUDE.md, docs/SESSIONS.md, docs/ mein blueprint aur Starter Guide (khaaskar uska section 03, screens wala), docs/design/, aur docs/build-sheets/[sys-0N].md padho (agar build sheet nahi hai to pehle blueprint se likho aur meri approval ka wait karo). Sirf apne git worktree mein, branch **[sys-0N-short-name]** par kaam karo, main par kabhi nahi, aur sirf is system ke folders mein. Naye tables ya columns sirf is system ki nayi migration file mein, sirf jodna, kabhi drop nahi. Agar koi shared file badalni ho, to docs/requests/ mein likho aur mujhe batao. Code se pehle: is system ki har screen ki list do (ek sawaal, ek main button, kaun, kis device par), simple text sketches mein; chhote phases mein plan do, har phase ke end mein kuch aisa jo main tumhari branch ke test address par phone par test kar sakun, aur pehla phase hamesha “mera asli data load karo aur mujhe ek sachchi list dikhao”; aur jo bhi cheez Ajay ji ke approval rule ya paise se judi ho uski list do. Mere OK ka wait karo.

PASTE · PURANA BUILDER SESSION · CONTINUE

CLAUDE.md, apni build sheet aur apni handover file padho. Paanch lines mein batao ye system kahan tak pahuncha hai aur aaj ki ek poori hone wali cheez kya hai. Plan banao aur mere OK ka wait karo.

Writing lane pehle din se chal sakti hai. Ye aapse ek-ek sawaal karke aapke shabdon mein formats aur SOPs likhegi:

PASTE · WRITING LANE · SKILLS (PEHLE DIN SE)

Tum GREATISH skills ke writing session ho. Tum sirf docs/ aur content/ mein likhoge, code kabhi nahi, aur koi chemical formulation kabhi nahi. Mujhse ek-ek sawaal pucho (Hinglish mein) aur humare shabdon mein ye files English mein likho: content/field-day.md (asli shop visit kise maanenge, fixed outcome list, beat plan rule, end-of-day report format, quotation cover note jisme rate line khaali ho); content/batch-record.md (batch numbering, batch manufacturing record, material issue slip, QC test report, finished goods inward note aur daily production report ke formats, machinery job card); content/sops.md (har department ka SOP paanch line mein: kaun, kab, kaun approve kare, kitna time, na hone par kisko bataya jaaye); content/hr-letters.md (offer, appointment, joining, confirmation, increment, warning, relieving aur experience letters, har salary aur faisla authorised insaan ke liye khaali). Har file ko draft mark karo jab tak main approve na karun, phir MAIN ko bolo ki use load kare.

04 BUILD, TEST, SWITCH ON

HAR SYSTEM KE LIYE SAME STEPS

1. **Har sitting mein ek poori cheez,** branch ke test address par phone par, ek asli record ke saath test karo. Jo bhi hairaani ho, wo `docs/rules-i-learned.md` mein likho.
2. **Screen check karo** Starter Guide ke section 03 se. Agar homework jaisi lage: *"Sirf design badlo, docs/design ke hisaab se. Features ko haath mat lagao."*
3. **Phase poora ho to merge.** Builder handover likhta hai; MAIN merge karta hai; live app lagbhag do minute mein update ho jaata hai.
4. **Paanch asli cases, phir ek team pehle.** Beat App ke liye: ek territory ke paanch executives ek hafte, phir sab. Store Gate ke liye: ek warehouse, phir baaki.
5. **Bharose se pehle shadow.** Field Verify Flow, dono auditors aur Duty Officer pehle sirf aapko report karte hain aur kuch nahi badalte, jab tak aap kuch hafte unke alerts parakh na lo. Mismatch sales head ke liye ek sawaal hai, kisi employee par faisla nahi.

AGAR KOI SESSION GALAT JAAYE: bolo *"Ruko. Jo toota hai wo simple shabdon mein batao aur do options do: aage theek karein, ya tumhare last commit par wapas jaayein."* Ek toota hua session kabhi live app ya doosre sessions ko nahi todta.

05 BUILD ORDER, SESSION BY SESSION

BLUEPRINT SE · EK SAATH TEEN TAK

HAFTE	MAIN	BUILDER A	BUILDER B	WRITING / BAAKI
1–2	F-00 Shared Record aur approval matrix (day 1)	**SYS-01** Beat App `sys-01-beat-app`	Khaali	Field Day Skill (writing)
3–6	Merges; har phone par Beat App	**SYS-02** Field Verify + Sales Command Board `sys-02-field-verify`	**SYS-03** Store Gate + Batch Record `sys-03-store-gate`	Batch Record formats (writing)

7–10	Merges; SOPs load	**SYS-04** Task Desk + Pending Work Board `sys-04-task-desk` , phir **SYS-05** Escalation Chain `sys-05-escalation`	**SYS-06** Plant Board `sys-06-plant-board`	Department SOPs (writing)
9–12	Tally connector aur Claude API, aapke haan ke saath	**SYS-07** Purchase to Tally `sys-07-purchase-tally`	**SYS-08** Plant + Sales Auditor, shadow `sys-08-auditors`	HR letters (writing)

PHASE	KAB POORA MAANA JAAYEGA (BLUEPRINT SE)
P1 · F-00, SYS-01	Architecture, roles aur approval matrix ek sitting mein sign-off ho chuke hain, aur har field executive ka Beat App par apna login hai, har claimed shop visit duty hours ke andar ek GPS check-in row ke roop mein maujood hai.
P2 · SYS-02, SYS-03	Har executive ki verified-vs-reported sheet roz subah bina call ke aapke phone par aati hai, aur plant ka har material movement ek Store Gate entry hai jo ek batch aur warehouse se stamped hai.
P3 · SYS-04 se SYS-06	Har department ke open aur overdue tasks Pending Work Board par ek naam ke saath dikhte hain, late items bina aapke phone kiye remind aur escalate ho chuke hain, aur Plant Board us hafte bane batches ki asli cost BOM ke against dikhata hai.
P4 · SYS-07, SYS-08	Field sales, plant, stores, purchase aur pending work ki asli halat ek jagah dikhti hai, matched purchases bina doosri typing ke Tally mein post hote hain, aur auditors ke exceptions ke saath ek daily AI report aapke phone par aati hai, taaki aapko employees se jaankari maangni na pade ya khud koi task chase na karna pade, hafte ke ek se do ghante mein.

GATES: koi builder tab tak shuru nahi hota jab tak F-00 aur approval matrix merge na ho. SYS-02 kuch hafte ke Beat App records ka wait karta hai; SYS-06 kuch hafte ke Store Gate aur batch records ka, aur aapki standard BOM costs ka. SYS-07 ko Tally mein kuch bhi post karne se pehle saaf supplier ledgers aur har material ki approved supplier list chahiye. SYS-08 shadow mode mein chalta hai: report karta hai, kuch badalta nahi.

Mahine 4 se 12, usi ghar mein: Duty Officer aur ek consolidated daily, weekly aur monthly report (mahine 4 se 6) → dealer aur customer profiles, credit limit monitoring aur approved wording mein WhatsApp se bakaya reminders (mahine 6 se 8) → poora HR module: attendance, leave, payroll inputs, PF aur ESI (mahine 8 se 10) → machinery service, tender tracking, document knowledge base aur CEO assistant (mahine 10 se 12). Har ek §03 se shuru hota hai.

06 JAB KISI CHEEZ MEIN PAISA LAGE

BUILD SE PEHLE DECIDE KARO

KYA CHAHIYE	PEHLI BAAR KAB	AAPKE LIYE MATLAB
Supabase Pro	Beat App live hone se pehle	Lagbhag $25 mahina: 50 se 100 executives ke GPS rows aur photos ke liye jagah, aur daily backups.

Tally connector	SYS-07	Tally Prime aapke office computer par chalta hai. OS usme Tally ke apne data interface se post karta hai, jiske liye wo computer on hona chahiye aur ek chhota connector program install hona chahiye, ya ek paid Tally connector service. Claude Code options aur kharcha dikhayega; faisla aapka.
Claude API key	SYS-08, phir Duty Officer	Auditors har raat chalte hain jab computer par koi nahi hota, jo Claude Max mein cover nahi hai. Use ke hisaab se bill, aapki set ki hui monthly spend limit ke saath, platform.claude.com par; key sirf Vercel mein jaati hai. Claude Code pehle anumanit monthly kharcha batayega.
WhatsApp Business API (optional)	Morning notes, suppliers ko PO, bakaya reminders	Sirf tab, jab aap ye cheezein app ya email ki jagah WhatsApp par chahte ho. Meta business verification, approved templates aur paid messages lagte hain.

PASTE · KOI BHI NAYI CHEEZ CONNECT KARNE SE PEHLE

Kuch bhi naya connect karne se pehle mujhe simple shabdon mein batao: ye kya hai, is system ko iski zaroorat kyun hai, humare liye iska mahine ka kharcha kitna hai, aur agar main mana karun to kya hoga. Phir mere haan ka wait karo. Koi bhi key sirf .env.local aur Vercel mein jaayegi, aur mujhe exactly batao Vercel mein kahan daalni hai aur redeploy kaise karna hai.

07 HAMESHA KAAM AANE WALE PROMPTS

PAAS RAKHO

- **Naya executive ya employee:** MAIN ko: *"[Naam] [company, territory ya department] mein [role] ke roop mein join kar raha hai. Uska login aur joining letter meri approval ke liye draft karo."*
- **Koi limit ya rule badla:** MAIN ko: *"Aaj se [rule ya limit]. Approval matrix aur CLAUDE.md update karo aur batao ye kaunse systems ko chhoota hai."*
- **Nayi company ya warehouse:** MAIN ko: *"[Company / warehouse] jodo. Kuch bhi badalne se pehle mujhe dikhao ki iske liye kya chahiye."*
- **Monthly check:** MAIN ko: *"Project ko CLAUDE.md aur mere guardrails ke against audit karo aur jo bhi toot raha ho wo simple shabdon mein batao."*

MONTHLY TEST: phone par OS kholo aur teen sawaal pucho. Kya har visit, order, batch aur task sach hai? Kya koi rate, credit, purchase ya payment bina zaroori haan ke nikla? Kya daily note hafte ko phone calls se behtar samjhata hai? Teen haan: agla system shuru karo. Ek bhi na: pehle use theek karo.
