ARCHI DESIGN OS STARTER GUIDE

MAHESH R. KHANDAGALE JI KE LIYE. AAPKE ACCOUNTS CONNECT HO CHUKE HAIN. AB BAS **FILES RAKHO, EK PROMPT PASTE KARO**, AUR CLAUDE CODE ARCHI DESIGN OS KI FOUNDATION BANA DEGA: STUDIO RECORD, ORGANISATION AUR APPROVAL LIMITS.

ACCOUNTS CONNECTED -- FILES DOCS MEIN -- **STARTER PROMPT** -- LOOK CHOOSE -- CONTINUE BUILDING

ROMANA KE SAATH CALL PAR HO CHUKA HAI

Claude Max, GitHub (private repository `archi-design-os`), Supabase (project `archi-design`, Mumbai) aur Vercel set up ho gaye hain aur aapke laptop par Claude Code se connect hain. Ek blank page aapke `.vercel.app` address par live hai.

YE GUIDE KYA KARTI HAI

Ek prompt: Claude Code aapka Blueprint Rev B aur Lean Master Plan padhta hai, aapke rules project mein likhta hai, foundation banata hai (har project, insaan, department, line manager, project captain aur approval limit ka ek record), aaj ki list banata hai, aur Phase 1 ke sessions plan karta hai. Phir aap look choose karte ho aur Continue Building Guide par jaate ho.

PAANCH DOCUMENTS

1 · AI Systems Blueprint Rev B
2 · Lean Master Plan v1.4 (details ke liye)
3 · Ye Starter Guide (ek baar)
4 · UI Guide (Step 3, aur har nayi screen se pehle)
5 · Continue Building Guide (Step 4 ke baad, har sitting)

TIME

Lagbhag 2 ghante ki ek sitting.

SOURCES

Blueprint BOA-2026-ARC-01 Rev B aur Lean Master Plan v1.4 (November 2026).

HAR STEP PAR DO AWAAZ: AAP KARO (AAPKE COMPUTER PAR EK CLICK) · CLAUDE CODE MEIN PASTE KARO (POORA BOX COPY KARO)

00 PEHLE YE PADHO

DO MINUTE

Aapne likha tha: *"My Business is Not growing because I am involved in daily office activities rather than focusing on a growth. Employees don't take ownership. I have to follow up constantly."* Blueprint Rev B aur Lean Master Plan iska jawab ek principle se dete hain: **manage by exception**. Team ek simple daily list se kaam karti hai, system follow-up, escalation aur scoring karta hai, aur aap sirf ek screen dekhte ho jisme wahi hai jo aapko chahiye. Phase 1 (6 hafte) mein teen cheezein banti hain: **Studio Ways** (aapke SOPs aur templates), **My Day** (har insaan ki 1 se 5 numbered task list) aur **Attendance** (eSSL machine ke saath phone punch, site wale dino ke liye).

Coding aani zaroori nahi. Har line Claude Code likhega. Aapka kaam: uske sawalon ka jawab apne shabdon mein do, sahi lage to OK bolo, aur jo bana hai use apne jaane-pehchane projects aur logon se check karo. Kuch samajh na aaye to likho `ye mujhe simple shabdon mein samjhao`. Kuch toot jaaye to error ya screenshot paste karke likho `ye simple shabdon mein samjhao aur theek karo`. Permission maange aur samajh na aaye to pehle likho `ye kya karega, simple shabdon mein batao?`

BHASHA: AAP HINGLISH MEIN, SYSTEM ENGLISH MEIN

Is guide ke saare prompts Hinglish mein hain. Claude aapse hamesha simple Hinglish mein baat karega, lekin system khud (code, files, database aur screens) English mein banega; starter prompt ye rule CLAUDE.md mein likh deta hai, taaki har session yaad rakhe. Peeche ke R2 aur R3 pages Claude ke liye hain aur English mein hi hain; aapko unhe padhna zaroori nahi.

KHARCHA KITNA

Claude Max (lagbhag $100 mahina) sab kuch build karta hai. GitHub free. Vercel Pro lagbhag $20 mahina. Supabase shuru mein free; site photos, drawings aur attendance bharne lagein to Pro (lagbhag $25 mahina, daily backup ke saath). eSSL machine ko jodne ke liye shayad office computer par ek chhota connector ya roz ki file import chahiye; Claude week 1 mein check karega. AI helpers (Nandini waghera) mahine 11 se 12 mein, optional, Claude API par. WhatsApp messages sirf aapke haan ke baad. Claude Code har kharcha pehle batayega aur aapke "haan" ka wait karega.

STEP 1

AAP KARO

Files ko project folder mein rakho

1. Wo folder kholo jo Romana ne aapke saath banaya tha: `Documents\archi-design-os`. Uske andar ek folder banao `docs`.
2. `docs` mein rakho: **AI Blueprint Rev B PDF**, **Lean Master Plan v1.4 PDF**, ye **Starter Guide PDF** aur **UI Guide PDF**. Continue Building Guide abhi side mein rakho, Step 4 tak.
3. `docs` ke andar ek folder `samples` banao aur jo hai wo daalo: aapki live projects ki list, aaj ka org chart (haath se bana photo bhi chalega), attendance aur leave policy, eSSL machine se export ki hui ek attendance file, ek drawing, ek site photo, aur koi bhi SOP, proposal ya BOQ format. Ye kabhi online nahi jaate; Claude inhe GitHub se bahar rakhta hai.

STEP 2

CLAUDE CODE MEIN PASTE KARO

Starter prompt. Claude app kholo → **Code** → `archi-design-os` folder par naya session shuru karo aur naam rakho `MAIN`. **AI Blueprint Rev B PDF** aur ye **Starter Guide PDF** message box mein drag karo, neeche wala poora box paste karo, aur send karo. Claude paanch stages mein kaam karega aur har stage ke baad aapke OK ka wait karega.

PASTE · STARTER PROMPT (MAIN SESSION)

Tum Archi Design OS set up kar rahe ho, Archi Design ke liye: ek architecture aur interior design studio jo turnkey interior, renovation, civil, commercial aur factory projects bhi karta hai. Main Mahesh R. Khandagale hoon, owner, aur main programmer nahi hoon. Attach kiye hue aur docs/ mein save hain mera AI Systems Blueprint Rev B aur Starter Guide; docs/ mein Lean Master Plan v1.4 bhi hai, jo har system ki details deta hai. Starter Guide ke pages R1, R2 aur R3 tumhare liye likhe gaye hain. Ye folder pehle se mere private GitHub repository, mere Vercel project aur .env.local mein Supabase keys se connected hai. Ye session **MAIN session** hai. Mujhse hamesha simple Hinglish mein baat karo, lekin system khud English mein banao: code, files, database, CLAUDE.md aur screens sab English mein. Paanch stages mein kaam karo. Har stage ke baad simple shabdon mein batao kya kiya, phir **ruk kar mere OK ka wait karo**. Ek baar mein ek hi sawaal pucho.

Stage 1: Padho aur check karo. Blueprint Rev B, Starter Guide aur Lean Master Plan padho. Das lines ya kam mein batao: Archi Design kya hai, meri teen problems, foundation aur nau systems, aur build order. Blueprint ke section 05 mein jo cheezein mujhe abhi settle karni hain unki list do; khud settle mat karna. Phir chupchaap check karo ki GitHub, Vercel aur Supabase keys kaam kar rahi hain, aur sirf tab batao jab kuch theek karna ho.

Stage 2: Rules. CLAUDE.md banao jisme Starter Guide ka page R2 word for word ho, saath mein R3 ka build brief aur session rules, aur ye line: "Owner se hamesha simple Hinglish mein baat karna; system English mein banana." Check karo ki .gitignore .env.local aur docs/samples ko bahar rakhe. Rules mujhe paanch lines mein Hinglish mein sunao.

Stage 3: Foundation. R3 ke hisaab se F-00 Archi Design Studio Record and Organisation banao: departments, levels, har insaan ka line manager aur deputy, project captains, approval limits, projects (type aur tier ke saath), templates, tasks (priority fields ke saath), sign-in, Row Level Security aur audit log. Mera org chart aur har approval limit (change order, purchase aur work order, discount, vendor payment) mujhse ek-ek line karke pucho; jo main abhi na bata sakun use "needs Mahesh" mark karo, guess mat karna. Mujhe exactly batao Supabase SQL Editor mein kya paste karna hai aur kahan click karna hai, aur Supabase mein kya set karna hai taaki mere live address par sign-in chale. Mera owner login add karo, push karo, aur confirm karo ki main apne phone par sign in kar sakta hoon.

Stage 4: Aaj ki list. Page R1 se docs/START-NOW.md banao: har item owner, start date aur tick box ke saath, sabse lamba pehle, aur har ek ka pehla kadam batao. Aage har session ki shuruaat mein mujhe yaad dilana jo tick nahi hua.

Stage 5: Sessions ka plan. docs/SESSIONS.md likho: Blueprint Rev B ka build order, kaunse systems alag sessions mein saath saath banenge (R3), aur har ek ki branch ka naam. Phase 1 ke teeno systems (SYS-01 Studio Ways, SYS-02 My Day and Escalation, SYS-03 Attendance and Leave) ke liye docs/build-sheets/ mein ek-ek file likho: wo kya karta hai, use kya kabhi nahi karna (blueprint aur master plan se), use kaunsa data chahiye, aur uska done-when. Abhi koi feature code nahi. Aakhir mein mujhe bolo ki UI Guide se look choose karun (Starter Guide ka Step 3) aur phir Continue Building Guide kholun (Step 4).

JAB CLAUDE BOLE KI SUPABASE MEIN KUCH PASTE KARO

Supabase project kholo, check karo ki browser address mein wahi project code hai jo Claude bata raha hai, **SQL Editor → New query** par click karo, paste karo, **Run** dabao, aur neeche **Success** dikhna chahiye. Laal text aaye to use copy karke Claude ko de do.

STEP 3

AAP KARO

UI Guide se look choose karo

Pehli asli screen se pehle **UI Guide** ke section 01 aur 02 follow karo: Pinterest par das minute, Claude app mein ek chat choose karne ke liye, aur MAIN ko ek message look aur colour themes dene ke liye. Baad mein har nayi screen isi guide se check hogi. Aap designer ho: aapka OS bhi saaf aur shaant dikhna chahiye, aur site engineers ise dhoop mein basic Android phone par use karenge.

STEP 4

AAP KARO

Ab Continue Building Guide kholo

Ye Starter Guide ek hi baar use hoti hai. Ab se **Continue Building Guide** use karni hai: har sitting ki shuruaat mein, har system shuru karne ke liye, aur ek saath kai sessions chalane ke liye. Uski PDF `docs/` mein tab daalo jab ye sab sach ho:

- [ ] Aap apne phone par `.vercel.app` address par OS mein sign in kar sakte ho.
- [ ] `CLAUDE.md` mein aapke rules hain; departments, line managers aur approval limits Supabase ke **Table Editor** mein dikhte hain.
- [ ] `docs/START-NOW.md`, `docs/SESSIONS.md` aur Phase 1 ki teeno build sheets (SYS-01, SYS-02, SYS-03) likhi gayi hain, aur aapne unhe padh kar sudhaar diya hai.
- [ ] `docs/design/` mein aapka chuna hua look aur colour themes hain.

Phir uska section 02, **Har sitting**, kholo aur follow karo. Koi box tick nahi hua to use MAIN mein paste karke bolo *"aage badhne se pehle ise theek karo."*

R1 CLOCKS: docs/START-NOW.md KE LIYE

STAGE 4 MEIN CLAUDE CODE PADHEGA

Wo cheezein jo aap ya aapki team par ruki hain. Har ek `docs/START-NOW.md` mein ek line banegi, owner, start date aur tick box ke saath.

#	KYA CHAHIYE	OWNER	KISKE LIYE
1	**Rev B confirm karo:** quote figures (2 of 3 vs 4 of 100), headcount aur aaj kaunse roles hain, master plan aapke studio ka hai ya nahi, kitne turnkey projects chal rahe hain aur kis type ke.	Mahesh ji	Day 1
2	**Build ka raasta:** Claude Code se khud build (ye guides) ya vendor RFP. Ye guides self-build ke liye hain.	Mahesh ji	Day 1
3	**Org chart aur limits:** departments, kaun head hai, har insaan ka line manager aur deputy, project captains; change order, PO, work order, discount aur vendor payment ke value bands.	Mahesh ji	F-00
4	**Teen guardrails, apne shabdon mein:** system akele kya kare, kya aapke signature ka wait kare, kya kabhi automate na ho. Tab tak R2 ke careful defaults.	Mahesh ji	Day 1
5	**eSSL machine:** model, firmware, network ya cable, logs khud aate hain ya export hote hain; har employee ka machine ID, shift aur normal kaam ki jagah.	Office admin	SYS-03
6	**Attendance aur leave policy** jaise aaj chalti hai: grace time, late marks, deduction, half-day aur full-day ghante, Sunday aur holiday kaam, leave types; aur har site ka address, site zone ke liye.	Mahesh ji / HR	SYS-03
7	**Writing sittings, hafte 1 se 2:** roz chase hone wale 10 se 15 tasks; har stage ka ek page; paanch project templates aur size tiers; quality gates; definitions of done; role cards; “Red project” ka matlab.	Mahesh ji, build team ke saath	SYS-01, SYS-02
8	**Studio Plan half-day:** core values, 3 se 5 saal ka target, brand promise, saal ki priorities, pehle quarter ke 3 se 5 Rocks aur ek Critical Number; aur aaj ke days to invoice aur days to collect.	Mahesh ji, leads ke saath	SYS-01, SYS-06
9	**Pilot:** design, site, sales aur accounts se 5 se 6 pilot users, aur unme se ek system admin.	Mahesh ji	SYS-02
10	**Pehla live Monday:** wo date jisse koi task muh se ya WhatsApp par nahi diya jaayega.	Mahesh ji	SYS-02
11	**Incentive pool ka percentage** (plan 3% se 5% suggest karta hai) aur role scorecards ke weights. Mahine 4 se pehle.	Mahesh ji, leads ke saath	SYS-07
12	**Deadline, busy season aur hafte ke ghante** build ke liye.	Mahesh ji	Planning

R2

THE RULES: FOR CLAUDE.md, WORD FOR WORD

STAGE 2 MEIN CLAUDE CODE PADHEGA · ENGLISH MEIN

STANDING RULES FOR EVERYTHING EVER BUILT IN THIS FOLDER, IN EVERY SESSION

House rules. 1 · ONE HOME: this folder, repository, database and app are the only ones Archi Design will ever have; every system is a new section of the same app reading the same projects, people and logins; a branch, team, service line or entity is added in Settings, never as a new app. 2 · EVERY PERSON THEIR OWN KEY: every person has their own login and sees only what their role needs (master plan §5C.6); the owner sees everything, with every override logged; no shared passwords. 3 · A HUMAN YES BEFORE ANYTHING LEAVES THE OFFICE OR MOVES MONEY: no message about dates, extra work or cost goes to a client, contractor or vendor, and no change order, purchase order, work order, discount or payment is approved, without the approver set in the approval matrix; one switch turns all automatic behaviour off without code. 4 · THE DIARY NOBODY CAN EDIT: every action is written to an append-only audit log. 5 · SECRETS STAY IN THE CUPBOARD: keys live only in .env.local and Vercel's settings, never in code, chat or GitHub. 6 · NUMBERS ARE CALCULATED, NEVER GUESSED: deadlines, priority numbers, attendance status, late marks, scores, budgets and incentives come from exact tested rules; AI never invents a figure. If anything you propose bends a rule, say so and wait for my decision.

Archi Design rules (careful defaults plus the Lean Master Plan v1.4, until Mahesh writes his own guardrails). AI may act alone only to: remind a person of their own task and its proof; rank tasks by the auto ranking rules; check a drawing's name and sheet list against the SOP; import punches and apply the attendance rules; compile summaries, scoreboards and scorecards for the owner. A person signs off: pricing and negotiation; every drawing before Released for Site; change orders, purchase and work orders, discounts and vendor payments by value band; every message to a client, contractor or vendor about dates, extra work or cost; every monthly scorecard before any incentive, deduction or appraisal figure is shown; late-mark waivers, corrections and outside-zone punches. Never automated: any quote, price, discount or committed date; design judgement and client advice; hiring, appraisal outcomes and consequences; continuous location tracking; public ranking of people. Location is captured only at punch in, punch out or site check-in, visible only to the person, their line manager, HR and the owner. Every task has one owner and a priority number; only leaders may set Do first, one at a time per person; a push by a leader is tagged "priority change" and never counts against the person; the system never shortens or extends a deadline. At most 3 notifications per person per day. Scorecards have at most four metrics per role, run two months in shadow mode, exclude client, authority and supplier delays visibly, and never count attendance twice; values are discussed, never scored. An approval waiting over 1 working day moves up one level; a named deputy covers leave. Rules, templates, gates, weights, thresholds and attendance settings live in Settings, editable by the admin, never in code. No form has more than 5 required fields; staff screens never show reports; labels use the studio's own words. AI helpers stay out until months 11 to 12 and only with Mahesh's yes. Unconfirmed blueprint figures are never hard-coded; docs/samples never go to GitHub.

R3 THE BUILD BRIEF: FOR CLAUDE CODE

MAHESH JI YE PAGE SKIP KAR SAKTE HAIN

STACK

Next.js (App Router, TypeScript, Tailwind) with theme tokens (Light, Dark, three palettes and the studio brand, chosen per user), Supabase (Postgres, Auth, Row Level Security, Storage) in the Mumbai region through `@supabase/ssr` and `@supabase/supabase-js`, deployed on Vercel from `main`; branches get preview deployments. Mobile-first web app added to the home screen; site diary and phone punch work offline and sync, using server time. Phone punch uses the browser's location only at the moment of punching, checked against site zones. eSSL link: confirm the model in week 1; preferred automatic sync, fallback a scheduled file import, matched by employee machine ID. Scheduled jobs (reminders, escalation, Digital Huddle, month-end) as Vercel Cron calling protected routes. Notifications in-app and email first; WhatsApp only with Mahesh's yes. Variables: `NEXT_PUBLIC_SUPABASE_URL`, `NEXT_PUBLIC_SUPABASE_PUBLISHABLE_KEY`, `SUPABASE_SECRET_KEY`, later `CRON_SECRET`; `.env.example` with names only. Follow the master plan's Appendix A user stories as acceptance checks and its Appendix C guardrails at every phase.

F-00 STUDIO RECORD AND ORGANISATION: THE STARTING SHAPE

departments; **positions** (level L0 to L5, department); **profiles** (name, phone, role, position, department, line manager, deputy, theme, language, machine ID, shift, normal place of work, active); **approval_limits** (decision type, role, value band, deputy, escalation hours); **projects** (client, type interior / renovation / civil / commercial / factory, tier 1 to 3, captain, stage, start and end dates, health colour); **project_members**; **templates**, **template_stages**, **template_tasks**; **tasks** (project, owner, why it matters, committed date, status, blocked reason, depends on, priority level, priority number, set by, reason for rank, pushed by); **rules** (type, values, changed by, changed on); **settings** (automation switch off by default); **audit_log** (append only). Row Level Security from master plan §5C.6. Attendance, drawings, site updates, leads, scores, budgets and the Studio Plan come in their own systems' migrations.

SESSIONS

- **MAIN** owns `main`, CLAUDE.md, docs/SESSIONS.md and the database; applies migrations in order and merges finished work.
- **One builder session per system**, at most three at a time, each in its own git worktree on branch `sys-0N-short-name`, touching only `app/(sys-0N)/` and `lib/sys-0N/`; new tables only in a new migration `<timestamp>_sys0N_<what>.sql`, adding, never dropping. Shared files change only in MAIN; requests in `docs/requests/`, handovers in `docs/handovers/`.
- **Writing lane** (SYS-01) writes only in `docs/` and `content/` from day 1.
- Talk to Mahesh in simple Hinglish; build the system in English. Plan first, wait for OK; every screen follows docs/design and the UI Guide; a dated note in `docs/sessions/` each sitting.

MAHESH R. KHANDAGALE JI KE LIYE · ARCHI DESIGN · BLUEPRINT BOA-2026-ARC-01 REV B AUR LEAN MASTER PLAN V1.4 PAR AADHAARIT.
STACK FIXED: CLAUDE CODE, NEXT.JS, SUPABASE, VERCEL, GITHUB.
